7. Government schools were given a CPU to encourage digital studies: The aim of the event is to inculcate the knowledge of computers to the students. The students will be taught basics of using Microsoft word and power point. This will help them in their projects and assignments that they do in the future. The first few minutes we gave a brief explanation of computers and its history. The rest one and half an hour we taught them MS word and MS power point. The students were eager to learn and were very enthusiastic.

8. Water supply connection was established to the government school and a medical camp was held for the villagers.

**Yettigadda Sangam village development activities drinking water, renovation 26-28 sept 2018**

9. Candle moulds were given to the Good Samaritan old age home to start their own business

Considering the need of the elderly we did the following changes

1. Candle moulds: we will provide them with 3 different types of candle moulds along with raw materials like wax, threads. This would enable them to be selfemployed.
2. Sanitation: We will provide the home with sanitary products such as Dettol, Lizol. Also to help them get an ease from mosquitoes and houseflies we will give them giving mosquito nets. We are planning to distribute blankets and monkey caps as well.

**Good Samaritans – Oldage home Alwal on 14 Dec 2018**

10. Sanitation was provided at the old age home for improving hygiene.

Old Age home is a home at Tukaram Gate, consisting of 30 old people and run by Ms.M.K Kamalamma. The inmates there live in a very poor condition and need all the help they can. Street-cause members provided and installed a tarpulin sheets on the roof to shelter them better as water leaks inside the home when it rains.They also replaced yellow-filament bulbs with CFL bulbs as they consume lesser electricity and last longer.Saris, Bed-sheets and other linen items, Sanitary items , Medical items for their daily care

Campus radios are not only sources of entertainment but also prove to be great starting points for aspiring RJs and content creators

# Step-ups to real time experience

Nikisha Uddagiri

There was a time when owning a radio was a big deal since it was the only source of entertainment. Later, with the explosion of technology, consumers found the convenience of smartphone overshadowing the simple box with the antenna and tuner. But still, the radio would continue to stay relevant throughout the ages offering unending entertainment to the young and old alike. Now there are a bunch of radio stations in many cities. As colleges joined the bandwagon, the radio became an important source on campus happenings.

Running a campus radio is no mean feat, as it involves keeping a constant lookout on latest news, sports, music and the events happening in the college or university. Programming is often done by students and may include programmers from experienced fields to head the station. Such Raju, a noted AB India Radio jockey, currently works as the radio programming manager at Gokulanga Rangaraju Institute of Engineering and Technology in Bachupally. "Our campus-based community radio, Pragnya 90.4 FM offers programmes ranging from campus stories, social instances, health tips, environmental awareness to special festival programmes," says Raju. The team of Pragnya focuses on content that is beneficial to individuals. For instance, they broadcasted a 70-episode

**IN SYNC** Students in a live session of the Francis Birl radio channel in St Francis College for Women, students performing a song on the radio channel Pragnya 90.4 FM of Gokulanga Rangaraju Institute of Engineering.

programme, Abhi Jangana koi aahle veechabed on the syllabus of competitive exams where they discussed the past and present developments in the State. Among the other shows they broadcast are: Mithunai, Community connect, Manchi/mata which is hosted by the principal of the college. The students of the college are generally sent on the field to record reactions of people in the sur-

roundings and cover college events. The radio's frequency ranges up to 10-12 km and can be accessed by the surrounding places, including schools and other colleges. Apart from students, the local community is also encouraged to participate and discuss various local issues. The college is now planning to introduce a three-month course for people who are interested in radio jockeying.

The University of Hyderabad (UOH) also has a similar radio which was established in 2011 by the Mass Communications Department. Soon after its launch, the channel Birl Hyderabad 90.4 FM created a buzz on campus with its live shows such as Unwoven, Jay Jay Hyderabad pick up talks, 'Thou art in peering', Shehar ke mohab abhi and Shikshai jal. A former mass communications stu-

Interestingly, the frequency magnitude of Pragnya and Birl Hyderabad are same, so the colleges sorted out the timings

dent, Anroga Lami, an established RJ at the time, was a part of the campus radio. "The radio ranging 10-15 km features shows based on college happenings and events, social issues and general music. The purpose of the radios is to both educate and entertain students. Any student can be a part of the radio," says Anroga Lami.

Interestingly, the frequency magnitude of Pragnya and Birl Hyderabad are same, so the colleges sorted out the timings so they don't overlap each other. Gokulanga Rangaraju broadcasts for 7 hours a day from 12 to 2 pm and 3 to 5 pm, while UOH broadcasts at 6 am for about three hours and from 5 to 8 am. Apart from the campus-based community radios in the city, some campus radios can be accessed through a website link anywhere. Francis Birl, the radio, started by St Francis College for Women is a web radio. "We started it for mass communications students so they can gain some experience. We also train the students on voice culture as part of that. Any student

who is interested in being a part of the radio station. They are encouraged to come up with their ideas, do interviews and figure out songs. During tests, students do news coverage with guest interviews, record guest lectures and play it with voiceovers. It helps build creativity and confidence," says faculty member Clement Babu. Most of the shows are broadcast during breaks which don't hinder regular classes. Students take care of the radio completely, a few take care of programming while others do hosting. Presently, the online radio has been stopped for a while, but the students are recording the shows and playing it on the campus. Well known RJ Arushi of Fever 104.9 FM was a part of the campus radio of the college.
