

GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING
AND TECHNOLOGY

Green Campus

AIM: To sustain all Natural resources by creating an Eco- friendly environment on the campus there by adopting the Engineering Technologies and Energy conservation methods.

Objectives: The main Objectives of the Green Campus are

1. Water conservation by Rain water Harvesting using Recharge pits, Recharge Bore wells
2. Adopting the alternative energy conservative system like solar plant
3. Reusing the energy by waste water and recycling of water using the sewerage treatment plant
4. Solid waste management using the Management and recycling by solid waste compost methods
5. Maintainance of the green and healthy environment on the campus by increaing green belt
6. Create healthy society and prevent water diseases , supply clear drinking water in the campus by means RO (reverse osmosis) system
7. Reduce air pollution on the campus by using electric vehicles and bicycles
8. Develop the fruit plantation to Improve Biodiversity.
