The engineering educational system needs to be designed for quick response times to match the speed of the growth. In order to match the society requirements, industries are utilizing the global resources and therefore the top performing engineering and management educational institutes must set their goals to serve the global society and hence the need for a well planned strategic plan along with a correction mechanism to achieve the goals. The plan also aims to meet the expectations from all the stake holders and achieve appreciable levels of satisfaction among students, faculty, parents and the employers with appropriate feed back mechanisms built into the system. • The major thrust of the Strategic Plan will be to achieve calibrated improvement in the quality of technical education that is imparted in line with the Vision and Mission of the Institute utilizing the core strengths of excellent infrastructure, talented student and teacher community and a deeply committed management to suit the emerging opportunities. <p style="text-align: center;"><u>Vision & Mission</u></p> <p><u>Vision</u> To be among the best of the institutions for engineers and technologists with attitudes, skills and knowledge and to become an epicenter of creative solutions.</p>

Mission

To achieve and impart quality education with an emphasis on practical skills and social relevance.

Core Values

- **Excellence** : Continually strive for achieving the highest standards in education and research
- **Integrity** : Sustain an atmosphere of honesty, openness, and transparency in all dealings
- **Innovation** : Promote a culture of curiosity and reward originality of thought and action
- **Entrepreneurship** : Promote and support entrepreneurial spirit among students
- **Leadership** : Develop industry leaders with the ability to find creative solutions to problems
- **Sustainability** : Conduct research that addresses critical global challenges Promote public awareness of the issues involved
- **Service to the Nation**: Utilize technology for the growth of national wealth

Goals

1. To produce skilled engineering professionals to fulfill the technological requirements of the industry & society globally.

Strategies:

- a) The key stake holders of teaching & learning process are exposed to best teaching methods, design approaches, current design tools, project management tools and the industrial development environment.
 - b) All the processes in the teaching and learning are updated as per the technological developments, national policies and the changing needs of the industry.
 - c) The knowledge seekers are exposed to all the professional skills that are necessary to enable them to be industry ready, so that the industry need not invest on them further.
2. To create professionals with research attitudes in all the core areas of engineering and management to produce innovative solutions for the development of the society.

		<p><u>Strategies:</u></p> <ul style="list-style-type: none"> a) Continuous upgrade of research & development facilities as per the current trends in collaboration with experts, from Industry as well as academia, for sustainable growth. b) The knowledge seekers are exposed to the research methodologies, current research, and transformation of its applications to the society. c) Continuous research by the faculty, within the frame work of National/International research foundations, NGOS and Industries to keep the institute in active research. d) Promotion of competency and Rewarding of Excellency are part of institute environment. <p>3. To enable the students to mature to be responsible humans and responsible citizens through integrated character development with deep awareness to ethics, skill and leadership qualities with environmental awareness for the improvement of the society.</p> <p><u>Strategies:</u></p> <ul style="list-style-type: none"> a) Provide a well rounded collegiate experience to the students with appropriate time and facilities for healthy co-curricular and extra-curricular activities. b) Help the students to develop their value systems with a balanced actions Inculcate a sense of environmental responsibility and sustainable development c) Emphasize the need to realize the importance of development of society. <p>4. To provide the student with equitable and affordable technical education of the best quality for the benefit of all the sections of the society.</p> <p><u>Strategies:</u></p> <ul style="list-style-type: none"> a) Provide equal opportunities to the students from all the sections of the society in a transparent manner. b) Provide financial assistance to the needy students to make the professional education affordable to the deserving. c) Introduce special hand holding measures to the

students requiring additional attention.

5. To be one of the best institutions offering technological education to suite the current societal needs while achieving the appropriate accreditation standards for global recognition and sustainability for working with the global institutions.

Strategies:

- a) Frequent reviews and updates to the structure of the courses to suite the emerging technological specializations and the changing needs of the industry so as to produce industry ready engineers.
 - b) Recruit the faculty suiting the institute requirements, motivate and develop them to be high caliber engineering professional teachers.
 - c) Continuously update the standards and methodologies to cater to the national and international accreditation processes for all the programs of the institute to create path for working with international institutions.
- It was suggested that proactive steps may be taken to establish mutually beneficial schemes with global institutions.
