

Ruedo'16

Ruedo is the annual environmental fest by NSS and Street Cause-GRIET. This year, Students from every section have completed an event related to environmental and social cause and display it finally on the day of RUEDO'16 on 31 Mar 2016.

The team of Ruedo'16 is proud to take the initiative for a better tomorrow. The motive of Ruedo'16 is to inculcate a sense of responsibility towards the environment and society. Unlike last year, Ruedo'16 this time is something inventive and competitive. It has been an impactful and interactive fest as it took a step to drive and initiate the students to various interesting events on any environmental or social cause.

According to the new structure of Ruedo this year every class had to do an event on any environmental or social theme. Owing to this creative and motivational objective we received a total of 62 events from all the classes (excluding the first years). The students took this opportunity in the true spirit of the fest and came up with a number of events.

As a result Ruedo'16 received many creative and impactful events such as photography, eco-friendly crafts, face-painting, plantation in water bottles (Green Wall), nests and water for birds, Inspirational short movies etc.

Ruedo'16 intends to develop moral values and rightful emotion towards people and nature in the students in cohesion with GRIET's Mission statement "To achieve and impart quality education with an emphasis on practical skills and social relevance.

Blood donation camp

This year camp was conducted 4 times and donated 458 units to Indian Red cross society.
