Health is a dynamic state of complete physical wellbeing, mental wellbeing and social wellbeing that involves the conscious attitude of continuous expansion and elevation of consciousness from moment to moment.  
 Consciousness is the state of being able to use senses and mental powers to understand what is happening (Oxford Advanced Learner's Dictionary)

Mental Health is defined as a state of wellbeing in which every individual realizes his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community (World Health Organization - WHO). Mental Health keeps the occupational health. According to WHO, all over the world, more than 280 million people of all ages are being affected by Depression, 40 million by Bipolar affective disorder, 24 million people by Schizophrenia and 40 million by Disruptive Conduct Disorder. 31 billion people (almost 40 percent of the world's population) can not afford a healthy diet. In 2021, some 193 million people experienced high acute food insecurity, 160 million children worldwide are engaged in child labour. Everyday more than 30000 people are forced to live their homes because of conflict and persecution. According to UNESCO, the defences of peace must be constructed in the mind: The motto of AICTE, JNTUH, IIT Kharagpur and IIM Kozhikode is "Vedaha Karmaam Kushalam" ( Meaning: Excellence in skilled action is YOGA). Present Outcome based education tries to develop higher order thinking, higher order empathic feeling and higher order action by Bloom's Taxonomy, Krathwohl's Taxonomy and Dave's Taxonomy respectively. These four international days of United Nations are being celebrated as part of outcome based education and also part of attainment of relevant graduate attributes of NBA.
