# Academic Regulations

## GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY, HYDERABAD For all Post Graduate Programmes (M.Tech) GR18 REGULATIONS

Gokaraju Rangaraju Institute of Engineering & Technology - 2018 Regulations (GR 18 Regulations) are given hereunder. These regulations govern all the Post Graduate programmes offered by various departments of Engineering with effect from the students admitted to the programmes in 2018-19 academic year.

1. **Programme Offered:** The Post Graduate programme offered by the department is M.Tech, a two-year regular programme in that discipline.
2. **Medium of Instruction:** The medium of instruction (including examinations and reports) is English.
3. **Admissions:** Admission into the M.Tech Programme in any discipline shall be made subject to the eligibility and qualifications prescribed by the University from time to time. Admissions shall be made either on the basis of the merit rank obtained by the student in PG CET conducted by the APS CHE for M. Tech Programmes or on the basis of any other order of merit approved by the University, subject to reservations as prescribed by the Government from time to time.
4. **Programme Pattern:**
  - a) **A student is introduced to “Choice Based Credit System (CBCS)” for which he/she has to register for the courses at the beginning of each semester as per the procedure.**
  - b) Each Academic year of study is divided into two semesters.
  - c) Minimum number of instruction days in each semester is 90.
  - d) The total credits for the Programme is 68.
  - e) **Grade points, based on percentage of marks awarded for each course will form the basis for calculation of SGPA (Semester Grade Point Average) and CGPA (Cumulative Grade Point Average).**
  - f) **A student has a choice of registering for credits from the courses offered in the programme.**
  - g) **All the registered credits will be considered for the calculation of final CGPA.**
5. **Award of M.Tech Degree:** A student will be declared eligible for the award of the M. Tech Degree if he/she fulfills the following academic requirements:
  - a) A student shall be declared eligible for the award of M.Tech degree, if he/she pursues the course of study and completes it successfully in not less than two academic years and not more than four academic years.
  - b) A Student, who fails to fulfill all the academic requirements for the award of the degree within four academic years from the date of admission, shall forfeit his/her seat in M.Tech course.
  - c) The Degree of M.Tech shall be conferred by Jawaharlal Nehru Technological University Hyderabad (JNTUH), Hyderabad, on the students who are admitted to the programme and fulfill all the requirements for the award of the degree.

## 6. Attendance Requirements

- a) A student shall be eligible to appear for the semester end examinations if he/she puts in a minimum of 75% of attendance in aggregate in all the courses concerned in the semester.
- b) Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in a semester may be granted. A committee headed by Dean (Academic Affairs) shall be the deciding authority for granting the condonation.
- c) Students who have been granted condonation shall pay a fee as decided by the Academic Council.
- d) Students whose shortage of attendance is not condoned in any semester are detained and are not eligible to take their end examinations of that semester. They may seek re-registration for that semester when offered next with the academic regulations of the batch into which he/she gets re-registered.

## 7. Paper Setting, Evaluation of Answer Scripts, Marks and Assessment

- a) Paper setting and Evaluation of the Answer Scripts shall be done as per the procedures laid down by the Academic Council of the College from time to time.
- b) The following is the division of marks between internal and external evaluations.

Particulars	Internal Evaluation	External Evaluation	Total
Theory	30	70	100
Practical	30	70	100
Mini Project	30	70	100
Dissertation	30	70	100

- c) The marks for internal evaluation per semester per theory course are divided as follows:

<b>i. Mid Examinations:</b>	<b>20 Marks</b>
<b>ii. Tutorials/Assignment:</b>	<b>5 Marks</b>
<b>iii. Continuous Assessment:</b>	<b>5 Marks</b>
<b>Total:</b>	<b>30 Marks</b>

- d) **Mid Examination:** There shall be two mid examinations during a semester. The first mid examination shall be conducted from the first 50 per cent of the syllabus and the second mid examination shall be conducted from the remaining 50 per cent of the syllabus. The mid examinations shall be evaluated for **20 marks** and average of the marks scored in the two mid examinations shall be taken as the marks scored by each student in the mid examination for that semester.
- e) **Assignment:** Assignments are to be given to the students and marks not exceeding 5 (5%) per semester per paper are to be awarded by the teacher concerned.

f. **For Internal Evaluation in Practical/Lab Subjects:** The marks for internal evaluation are 30. Internal Evaluation is done by the teacher concerned with the help of the other staff members nominated by Head of the Department. Marks Distribution is as follows:

i.	Internal Exam:	10 Marks
ii.	Record:	05 Marks
iii.	Continuous Assessment:	15 Marks
	Total:	30 Marks

g. **For External Evaluation in Practical/Lab Subjects:** The semester end examination shall be conducted by an external examiner and a staff member of the department nominated by Head of the Department.

h. For approval and evaluating mini project, Dissertation-I and Dissertation-II, a project Review Committee (PRC) will be constituted by the Head of the Department. The composition of PRC is as follows i) Head of the Department ii) one senior faculty relevant to the specialization iii) coordinator of the specialization.

i. **Mini Project:** The Mini Project is to be taken up with relevance to Industry and is evaluated for 100 marks. Out of 100 marks, 30 marks are for internal evaluation and 70 marks are for external evaluation.

**Internal Evaluation:** For internal evaluation, 10 Marks are given by PRC based on project reviews and 5 marks for the quality of report and abstract submitted. The supervisor continuously assesses the student performance for 15 marks. Tentative presentation dates and marks distribution of the mini project

S.No	Date	Review	Marks
<b>Internal Marks (30)</b>			
1	First week of the semester	Abstract submission*	5
2	Mid of the semester	Second review	10
3	Last week of the semester	Last review	15

\*Following are the guidelines for the abstract submission

The faculty are requested to check the document submitted in the first review and should contain following

1. Title of the project and Literature review
2. Schematic/Block diagram which gives the board idea of the entire project (Mini project to major project in 3rd and 4th semesters)
3. Timeline or milestone of the project. It should clearly indicate deliverables/outcomes of the project.
4. Components required with approximate cost
5. References

### **External Evolution: (70 Marks)**

The mini project report is presented before PRC along with the supervisor and the same is evaluated for 70 marks. At the end of the semester the mini project report is evaluated by PRC.

#### **Guidelines to award 70 marks:**

S.No	Date	Review/ PRC report	Marks
External Evaluation Marks (70)			
1	Last week of the semester	Final Presentation and report Submission	10
2	Project report :Project report should be written as per IEEE guidelines.	Verified by PRC	20
3	Project Deliverables <ul style="list-style-type: none"> <li>• Hardware prototype</li> <li>• Simulation in any authorized software</li> <li>• Submission of research articles in any Scopus indexed conference /Journal</li> </ul>	Verified by PRC	30
4	Results and Discussion	Verified by PRC	10

**ii. Dissertation (Phase I & Phase II):**

**Internships/Seminars/Dissertation Phase I:**

The Dissertation Phase I, the department help the students to do the projects supported by the industry and is evaluated for 100 marks. Out of 100 marks, 30 marks are for internal evaluation and 70 marks are for external evaluation.

**Internal Evaluation:** For internal evaluation, 10 Marks are given by the PRC based on project reviews and 5 marks for the quality of report and abstract submitted. The supervisor continuously assesses the student performance for 15 marks. Tentative presentation dates and marks distribution of the mini project

S.No	Date	Review	Marks
<b>Internal Marks (30)</b>			
1	1st week of the semester	Abstract submission*	5
2	Mid of the semester	Second review	10
3	Last week of the semester	Last review	15

\*Following are the guidelines for the abstract submission

The faculty are requested to check the document submitted in the first review and should contain following

1. Title of the project and the literature review
2. Schematic/Block diagram which gives the board idea of the entire project
3. Timeline or milestone of the project. It should clearly indicate deliverables/outcomes of the project.
4. Components required with approximate cost
5. Possibility to develop Product

**External Evolution: (70 Marks)**

The mini project report is presented before PRC along with the supervisor and the same is evaluated for 70 marks. At the end of the semester the mini project report is evaluated by PRC.

**Guidelines to award 70 marks:**

S.No	Date	Review/ PRC report	Marks
<b>External Evaluation Marks (70)</b>			
1	Last week of the semester	Final Presentation and report Submission	10
2	Project report submission- Project report should be written as per IEEE guidelines.	Verified by PRC	20
3	Project Deliverables <ul style="list-style-type: none"> <li>• Hardware prototype</li> <li>• Simulations in any authorized software</li> <li>• Submission of research articles in any Scopus indexed conference /Journal</li> <li>• Product development</li> <li>• Industry Support</li> </ul>	Verified by PRC	30
4	Results and Discussion	Verified by PRC	10

### iii. **Dissertation Phase II:**

#### **Dissertation Phase II:**

The Dissertation Phase II, the department help the students to do the project at industry and is evaluated for 100 marks. Out of 100 marks, 30 marks are for internal evaluation and 70 marks are for external evaluation. It is expected that along with the project he will be placed in the company.

**Internal Evaluation:** For internal evaluation, 10 Marks are given by the PRC based on project reviews and 5 marks for the quality of report and abstract submitted. The supervisor continuously assesses the student performance for 15 marks. Tentative presentation dates and marks distribution of the mini project

S.No	Date	Review	Marks
<b>Internal Marks (30)</b>			
1	1 <sup>st</sup> week of the semester	Abstract submission*	5

2	Mid of the semester	Second review	10
3	Last week of the semester	Last review	15

\*Following are the guidelines for the abstract submission

The faculty are requested to check the document submitted in the first review and should contain following

1. Title of the project and the literature review
2. Schematic/Block diagram which gives the board idea of the entire project
3. Timeline or milestone of the project. It should clearly indicate deliverables/outcomes of the project.
4. Components required with approximate cost
5. Possibility to develop Product and IPR

### **External Evolution: (70 Marks)**

The mini project report is presented before PRC along with the supervisor and the same is evaluated for 70 marks. At the end of the semester the mini project report is evaluated by PRC.

### **Guidelines to award 70 marks:**

S.No	Date	Review/ PRC report	Marks
External Evaluation Marks (70)			
1	Last week of the semester	Final Presentation and report Submission	10
2	Project report submission- Project report should be written as per IEEE guidelines.	Verified by PRC and External Examiner	20
3	Project Deliverables <ul style="list-style-type: none"> <li>• Hardware prototype</li> <li>• Simulations in any authorized software</li> <li>• Submission of research articles in any Scopus indexed conference /Journal</li> <li>• Product development</li> <li>• Industry Support</li> </ul>	Verified by PRC and External Examiner	30

4	Results and Discussion	Verified by PRC and External Examiner	10
---	------------------------	---------------------------------------	----

**Rules and regulations related to Internships/Seminars/Dissertation Phase I and II:**

The student must work under the guidance of both internal guide (one faculty member of the department) and external guide (from Industry not below the rank of an officer). Internal guide is allotted by the Head of the Department or Program Coordinator, whereas external guide is allotted by the industrial organization in which the project is undertaken.

- After approval from the PRC, the final thesis is to be submitted along with ANTI- PLAGIARISM report from the approved agency with a similarity index not more than 24%.
- Two hardcopies and one soft copy of the project work (dissertation) certified by the research supervisors shall be submitted to the College/Institute.
- The thesis shall be adjudicated by one external examiner selected by the Institute out of 5-member panel, submitted by the department.
- In both internal and external evaluations, the student shall score at least 40% marks and an aggregate of 50% marks to pass in the project work. If the project report is satisfactory, Viva-voce examination shall be conducted by a Board consisting of the Supervisor, Head and the External Examiner who adjudicated the project work. The Board shall jointly evaluate the student’s performance in the project work.
- In case the student doesn’t pass through the project work, he/she must reappear for the viva-voce examination, as per the recommendations of the Board. If he fails succeed at the second Viva-voce examination also, he will not be eligible for the award of the degree, unless he is asked to revise and resubmit the Project by the Board. Head of the Department and program coordinator shall coordinate and make arrangements for the conduct of viva-voce examination. When one does get the required minimum marks both in internal and external evaluations the candidate has to revise and resubmit the dissertation in the time frame prescribed by the PRC. If the report of the examiner is unfavorable again, the project shall be summarily rejected.
- If a student gets a chance to work in industry for one year (placement through internship) then he/she should take permission from Principal, Dean of examinations, Dean of Placements, Dean Academics, Department HOD and program coordinator. He/she should complete the credits in 3<sup>rd</sup> semester in consultation with course instructor and program coordinator.

**8. Recounting of Marks in the End Examination Answer Books:** A student can request for re-counting of his/her answer book on payment of a prescribed fee.

9. **Re-evaluation of the End Examination Answer Books:** A student can request for re-evaluation of his/her answer book on payment of a prescribed fee.
10. **Supplementary Examinations:** A student who has failed in an end semester examination can appear for a supplementary examination, as per the schedule announced by the College/Institute.
11. **Malpractices in Examinations:** Disciplinary action shall be taken in case of malpractices during Mid/ End-examinations as per the rules framed by the Academic Council.

**12. Academic Requirements:**

- a) A student shall be deemed to have secured the minimum academic requirement in a subject if he / she secures a minimum of 40% of marks in the Semester-end Examination and a minimum aggregate of 50% of the total marks in the Semester-end examination and Internal Evaluation taken together.
- b) A student shall be promoted to the next semester only when he/she satisfies the requirements of all the previous semesters.
- c) In order to qualify for the award of M.Tech Degree, the student shall complete the academic requirements of passing in all the Courses as per the course structure including Seminars and Project if any.
- d) In case a Student does not secure the minimum academic requirement in any course, he/she has to reappear for the Semester-end Examination in the course, or re-register for the same course when next offered or re-register for any other specified course, as may be required. However, one more additional chance may be provided for each student, for improving the internal marks provided the internal marks secured by a student are less than 50% and he/she failed finally in the course concerned. In the event of taking another chance for re-registration, the internal marks obtained in the previous attempt are nullified. In case of re-registration, the student has to pay the re-registration fee for each course, as specified by the College.
- e) **Grade Points: A 10- point grading system with corresponding letter grades and percentage of marks, as given below, is followed:**

<b>Letter Grade</b>	<b>Grade Points</b>	<b>Percentage of marks</b>
<b>O (Outstanding)</b>	<b>10</b>	<b>Marks <math>\geq</math> 90</b>
<b>A+ (Excellent)</b>	<b>9</b>	<b>Marks <math>\geq</math> 80 and Marks <math>&lt;</math> 90</b>
<b>A (Very Good)</b>	<b>8</b>	<b>Marks <math>\geq</math> 70 and Marks <math>&lt;</math> 80</b>
<b>B+ (Good)</b>	<b>7</b>	<b>Marks <math>\geq</math> 60 and Marks <math>&lt;</math> 70</b>
<b>B (Above Average)</b>	<b>6</b>	<b>Marks <math>\geq</math> 50 and Marks <math>&lt;</math> 60</b>
<b>F (Fail)</b>	<b>0</b>	<b>Marks <math>&lt;</math> 50</b>
<b>Ab (Absent)</b>	<b>0</b>	

### Earning of Credit:

A student shall be considered to have completed a course successfully and earned the credits if he/she secures an acceptable letter grade in the range O-C. Letter grade 'F' in any Course implies failure of the student in that course and no credits earned. **Computation of SGPA and CGPA:**

The UGC recommends the following procedure to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

- i)  $S_k$  the SGPA of  $k^{\text{th}}$  semester(1 to 4) is the ratio of sum of the product of the number of credits and grade points to the total credits of all courses registered by a student, i.e.,

$$\text{SGPA } (S_k) = \frac{\sum_{i=1}^n (C_i * G_i)}{\sum_{i=1}^n C_i}$$

Where  $C_i$  is the number of credits of the  $i^{\text{th}}$  course and  $G_i$  is the grade point scored by the student in the  $i^{\text{th}}$  course and  $n$  is the number of courses registered in that semester.

- ii) The CGPA is calculated in the same manner taking into account all the courses  $m$ , registered by a student over all the semesters of a programme, i.e., upto and inclusive of  $S_k$ , where  $k \geq 2$ .

$$\text{CGPA} = \frac{\sum_{i=1}^m (C_i * G_i)}{\sum_{i=1}^m C_i}$$

- iii) The SGPA and CGPA shall be rounded off to 2 decimal points.

13. **Award of Class:** After a student satisfies all the requirements prescribed for the completion of the Degree and becomes eligible for the award of M. Tech Degree by JNTUH, he/she shall be placed in one of the following four classes:

	Class Awarded	CGPA Secured
13.1	First Class With Distinction	CGPA $\geq 7.75$
13.2	First Class	CGPA $\geq 6.75$ and CGPA $< 7.75$
13.3	Second Class	CGPA $\geq 6.00$ and CGPA $< 6.75$

14. **Withholding of Results:** If the student has not paid dues to the Institute/ University, or if any case of indiscipline is pending against him, the result of the student (for that Semester) may be withheld and he will not be allowed to go into the next Semester. The award or issue of the Degree may also be withheld in such cases.

15. **Transfer of students from the Constituent Colleges of JNTUH or from other Colleges/ Universities:** Transfer of students from the Constituent Colleges of JNTUH or from other Colleges/ Universities shall be considered only on case-to-case basis by the Academic Council of the Institute.

16. **Transitory Regulations:** Students who have discontinued or have been detained for want of attendance, or who have failed after having undergone the Degree Programme, may be considered eligible for readmission to the same or equivalent subjects as and when they are offered.

### 17. General Rules

- a) The academic regulations should be read as a whole for the purpose of any interpretation.
- b) In the case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Academic Council is final.
- c) In case of any error in the above rules and regulations, the decision of the Academic Council is final.
- d) The college may change or amend the academic regulations or syllabi at any time and the changes or amendments made shall be applicable to all the students with effect from the dates notified by the college.

**EMBEDDED SYSTEMS DESIGN**

**Course Code: GR18D5099**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To introduce the difference between embedded systems and general purpose systems
- To optimize hardware designs of custom single-purpose processors.
- To compare different approaches in optimizing general-purpose processors.
- To introduce different peripheral interfaces to embedded systems. .
- To apply knowledge gained in software-hardware integration in team-based projects.

**Course outcomes**

- Differentiate embedded system design models using different processor technologies (single-purpose, general-purpose, application specific processors).
- Describe and compare the various types of peripherals used in embedded systems.
- Apply modern engineering tools necessary for integrating software and hardware components in embedded system designs.
- Analyze Embedded Firmware Design Approaches and Development Languages..
- Demonstrate which operating system/real time operating system is best suitable for the decided embedded application

**Unit I: INTRODUCTION TO EMBEDDED SYSTEMS**

Definition of Embedded System, Embedded Systems Vs General Computing Systems, History of Embedded Systems, Classification, Major Application Areas, Purpose of Embedded Systems, Characteristics and Quality Attributes of Embedded Systems.

**Unit II: TYPICAL EMBEDDED SYSTEM**

Core of the Embedded System: General Purpose and Domain Specific Processors, ASICs, PLDs, Commercial Off-The-Shelf Components (COTS), Memory: ROM, RAM, Memory according to the type of Interface, Memory Shadowing, Memory selection for Embedded Systems, Sensors and Actuators, Communication Interface: On-board and External Communication Interfaces.

**Unit III: EMBEDDED FIRMWARE**

Reset Circuit, Brown-out Protection Circuit, Oscillator Unit, Real Time Clock, Watchdog Timer, Embedded Firmware Design Approaches and Development Languages.

#### **Unit IV: RTOS BASED EMBEDDED SYSTEM DESIGN**

Operating System Basics, Types of Operating Systems, Tasks, Process and Threads, Multiprocessing and Multitasking, Task Scheduling.

#### **Unit V: TASK COMMUNICATION**

Shared Memory, Message Passing, Remote Procedure Call and Sockets, Task Synchronization: Task Communication/Synchronization Issues, Task Synchronization Techniques, Device Drivers, How to Choose an RTOS.

#### **Text Books**

1. Introduction to Embedded Systems - Shibu K.V, Mc Graw Hill.

#### **Reference Books**

1. Embedded Systems - Raj Kamal, TMH.
2. Embedded System Design - Frank Vahid, Tony Givargis, John Wiley.
3. Embedded Systems – Lyla, Pearson, 2013
4. An Embedded Software Primer - David E. Simon, Pearson Education

**MICROCONTROLLERS FOR EMBEDDED SYSTEM DESIGN**

**Course Code: GR18D5100**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To introduce the outline architecture of ARM7 microcontroller including basics of pipelines, registers, exception modes.
- To set up and customize a microcontroller development environment.
- To give an overview of system peripherals which cover bus structure, memory map, register programming and much more.
- To write programs that interact with other devices.
- To learn the Memory Management of RISC Microcontrollers.

**Course outcomes**

- An ability to understand the hardware implementation of the ARM7 microcontrollers.
- An ability to integrate peripherals based on I/O functions.
- An ability to learn the concept of pipelines, registers and exception modes.
- An ability to interpret the functions of Memory Management Unit (MMU).
- An ability to compare the performance of various ARM families of Microcontrollers.

**Unit I: ARM ARCHITECTURE**

ARM Design Philosophy, Registers, Program Status Register, Instruction Pipeline, Interrupts and Vector Table, Architecture Revision, ARM Processor Families.

**Unit II: ARM PROGRAMMING MODEL – I**

Instruction Set: Data Processing Instructions, Addressing Modes, Branch, Load, Store Instructions, PSR Instructions, Conditional Instructions.

**Unit III: ARM PROGRAMMING MODEL – II**

Thumb Instruction Set: Register Usage, Other Branch Instructions, Data Processing Instructions, Single-Register and Multi Register Load-Store Instructions, Stack, Software Interrupt Instructions.

**Unit IV: ARM PROGRAMMING**

Simple C Programs using Function Calls, Pointers, Structures, Integer and Floating Point Arithmetic, Assembly Code using Instruction Scheduling, Register Allocation, Conditional Execution and Loops.

## **Unit V: MEMORY MANAGEMENT**

Cache Architecture, Policies, Flushing and Caches, MMU, Page Tables, Translation, Access Permissions, Context Switch.

### **Text Books**

1. ARM Systems Developer's Guides- Designing & Optimizing System Software – Andrew N. Sloss, Dominic Symes, Chris Wright, 2008, Elsevier.

### **Reference Books**

1. Embedded Microcomputer Systems, Real Time Interfacing – Jonathan W. Valvano – Brookes / Cole, 1999, Thomas Learning.

**EMBEDDED REAL TIME OPERATING SYSTEMS**

**Course Code: GR18D5101**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To use Unix/Linux operating system as the working platform for embedded system development.
- To demonstrate system programming for input output file operations and process control operations.
- To demonstrate coding techniques involving multiprocessing.
- To apply the techniques of establishing synchronization among different tasks.
- To apply the coding techniques for the embedded applications involving interrupts and real time responses.

**Course outcomes**

- Students will be able to operate on a Unix/Linux operating system for embedded system application code development.
- Students will be skillful to perform some basic level system programming.
- Students will be equipped with the coding techniques to establish synchronization in embedded systems involving multiprocessing.
- Students will be in a position to recommend about an operating system/real time operating system for the decided embedded application.
- Students will be able to compare the different Real Time Operating Systems and can choose the best one for the underlined embedded application.

**Unit I: INTRODUCTION**

Introduction to UNIX/LINUX, Overview of Commands, File I/O(open, create, close, lseek, read, write), Process Control ( fork, vfork, exit, wait, waitpid, exec).

**Unit II: REAL TIME OPERATING SYSTEMS**

Brief History of OS, Defining RTOS, The Scheduler, Objects, Services, Characteristics of RTOS, Defining a Task, Task States and Scheduling, Task Operations, Structure, Synchronization, Communication and Concurrency. Defining Semaphores, Operations and Use, Defining Message Queue, States, Content, Storage, Operations and Use

**Unit III: OBJECTS, SERVICES AND I/O**

Pipes, Event Registers, Signals, Other Building Blocks, Component Configuration, Basic I/O Concepts, I/O Subsystem.

#### **Unit IV: EXCEPTIONS, INTERRUPTS AND TIMERS**

Exceptions, Interrupts, Applications, Processing of Exceptions and Spurious Interrupts, Real Time Clocks, Programmable Timers, Timer Interrupt Service Routines (ISR), Soft Timers, Operations.

#### **Unit V: CASE STUDIES OF RTOS**

RT Linux, MicroC/OS-II, Vx Works, Embedded Linux, Tiny OS, and Basic Concepts of Android OS.

#### **Text Books**

1. Real Time Concepts for Embedded Systems – Qing Li, Elsevier, 2011

#### **Reference Books**

- 1.Embedded Systems- Architecture, Programming and Design by Rajkamal, 2007, TMH.
- 2.Advanced UNIX Programming, Richard Stevens
- 3.Embedded Linux: Hardware, Software and Interfacing – Dr. Craig Hollabaugh.

**VLSI TECHNOLOGY AND DESIGN**

**Course Code: GR18D5083**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To enable the student to visualize MOS fabrication technologies and to understand electrical properties of MOS, CMOS and Bi CMOS circuits.
- To train the student to draw integrated circuit layouts following design rules.
- To enable the student design combinational circuit, do verification, power optimization and network testing.
- To enable the student to use power optimization techniques, design validation procedures and testing of sequential circuits.
- To train the student to use different floor planning methods and different low power architectures.

**Course outcomes**

After going through this course the graduate student will be able to

- Visualize the steps taken for MOS fabrication technologies.
- Analyze electrical behaviour of MOS, CMOS and Bi CMOS circuits.
- Design sequential circuits using different clocking disciplines.
- Carry out power optimization techniques, design validation procedure and testing of circuits.
- Carry out floor planning for different low power architectures.

**Unit I: REVIEW OF MICROELECTRONICS AND INTRODUCTION TO MOS TECHNOLOGIES**

MOS, CMOS, BiCMOS Technology, Basic Electrical Properties of MOS, CMOS & BiCMOS Circuits:  $I_{ds} - V_{ds}$  relationships, Threshold Voltage  $V_t$ ,  $g_m$ ,  $g_{ds}$  and  $\omega_o$ , Pass Transistor, MOS, CMOS & Bi CMOS Inverters,  $Z_{p.u}/Z_{p.d}$ , MOS Transistor circuit model, Latch-up in CMOS circuits.

## **Unit II: LAYOUT DESIGN AND TOOLS**

Transistor structures, Wires and Vias, Scalable Design rules, Layout Design tools. **Logic Gates & Layouts:** Static Complementary Gates, Switch Logic, Alternative Gate circuits, Low power gates, Resistive and Inductive interconnect delays.

## **Unit III: COMBINATIONAL LOGIC NETWORKS**

Layouts, Simulation, Network delay, Interconnect design, Power optimization, Switch logic networks, Gate and Network testing.

## **Unit IV: SEQUENTIAL SYSTEMS**

Memory cells and Arrays, Clocking disciplines, Design, Power optimization, Design validation and testing

## **Unit V: FLOOR PLANNING**

Floor planning methods, Global Interconnect, Floor Plan Design, Off-chip connections.

### **Text Books**

1. Essentials of VLSI Circuits and Systems, K. Eshraghian, D. A. Pucknell, 2005, PHI.
2. Modern VLSI Design – Wayne Wolf, 3rd Ed., 1997, Pearson Education.

### **Reference Books**

1. Introduction to VLSI Systems: A Logic, Circuit and System Perspective – Ming-BO Lin, CRC Press, 2011.
2. Principles of CMOS VLSI Design – N.H.E Weste, K. Eshraghian, 2nd Ed., Addison Wesley.

**EMBEDDED COMPUTING**

**Course Code: GR18D5102**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To demonstrate the student to program on linux platform.
- To have an outline on operating systems.
- To explain the overview of software development tools.
- To explain the basics of networking
- To summarize IA32 Instruction set and explain the students to work with simulation and debugging tools.

**Course outcomes**

- An ability to develop programming on linux platform.
- To analyse operating system overview.
- An ability to design using various software development tools.
- To analyse interfacing modules.
- To interpret basics of networking

**Unit I: PROGRAMMING ON LINUX PLATFORM**

System Calls, Scheduling, Memory Allocation, Timers, Embedded Linux, Root File System, Busy Box. Operating System Overview: Processes, Tasks, Threads, Multi-Threading, Semaphore, Message Queue.

**Unit II: INTRODUCTION TO SOFTWARE DEVELOPMENT TOOLS**

GNU GCC, make, gdb, static and dynamic linking, C libraries, compiler options, code optimization switches, lint, code profiling tools,.

**Unit III: INTERFACING MODULES**

Sensor and actuator interface, data transfer and control, GPS, GSM module interfacing with data processing and display, OpenCV for machine vision, Audio signal processing.

#### **Unit IV: NETWORKING BASICS**

Sockets, ports, UDP, TCP/IP, client server model, socket programming, 802.11, Bluetooth, ZigBee, SSH, firewalls, network security.

#### **Unit V: IA32 INSTRUCTION SET**

Application binary interface, exception and interrupt handling, interrupt latency, assemblers, assembler directives, macros, simulation and debugging tools.

#### **Text Books**

1. Modern Embedded Computing - Peter Barry and Patrick Crowley, 1st Ed., Elsevier/Morgan Kaufmann, 2012.
2. Linux Application Development - Michael K. Johnson, Erik W. Troan, Addison Wesley, 1998.
3. Assembly Language for x86 Processors by Kip R. Irvine
4. Intel® 64 and IA-32 Architectures Software Developer Manuals

#### **Reference Books**

1. Operating System Concepts by Abraham Silberschatz, Peter B. Galvin and Greg Gagne.
2. The Design of the UNIX Operating System by Maurice J. Bach Prentice-Hall
3. UNIX Network Programming by W. Richard Stevens

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**DIGITAL SYSTEM DESIGN**

**Course Code: GR18D5078**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- Learn digital design of Sequential Machines.
- Learn drawing state graphs.
- Learn realization and implementation of SM Charts.
- Learn Fault modeling and test pattern generation of Combinational circuits.
- Learn fault diagnosis in sequential circuits and understand machine design, identification of fault detection experiment.

**Course outcomes**

- Create understanding of the design techniques of sequential Machines.
- Create understanding of the fundamental concepts of PLD's, design of FPGA's.
- Develop skills in modelling Sequential circuits in terms of reliability, availability and safety.
- Develop skills in modelling fault detection experiments of sequential circuits.
- Develop skills in modelling combinational circuits in terms of reliability, availability and safety.

**Unit I: MINIMIZATION AND TRANSFORMATION OF SEQUENTIAL MACHINES**

The Finite State Model – Capabilities and limitations of FSM – State equivalence and machine minimization – Simplification of incompletely specified machines. Fundamental mode model – Flow table – State reduction – Minimal closed covers – Races, Cycles and Hazards.

**Unit II: DIGITAL DESIGN**

Digital Design Using ROMs, PALs and PLAs, BCD Adder, 32 – bit adder, State graphs for control circuits, Scoreboard and Controller, A shift and add multiplier, Array multiplier, Keypad Scanner, Binary divider.

**Unit III : SM CHARTS**

State machine charts, Derivation of SM Charts, Realization of SM Chart, Implementation of Binary Multiplier, dice game controller.

#### **Unit IV: FAULT MODELING & TEST PATTERN GENERATION**

Logic Fault model – Fault detection & Redundancy-Fault equivalence and fault location – Fault dominance – Single stuck at fault model – Multiple stuck at fault models – Bridging fault model. Fault diagnosis of combinational circuits by conventional methods – Path sensitization techniques, Boolean Difference method – Kohavi algorithm – Test algorithms – D algorithm, PODEM, Random testing, Transition count testing, Signature analysis and test bridging faults.

#### **Unit V: FAULT DIAGNOSIS IN SEQUENTIAL CIRCUITS**

Circuit Test Approach, Transition Check Approach – State identification and fault detection experiment, Machine identification, Design of fault detection experiment.

#### **Text Books**

1. Fundamentals of Logic Design – Charles H. Roth, 5th Ed., Cengage Learning.
2. Digital Systems Testing and Testable Design – Miron Abramovici, Melvin A. Breuer and Arthur D. Friedman- John Wiley & Sons Inc.
3. Logic Design Theory – N. N. Biswas, PHI

#### **Reference Books**

1. Switching and Finite Automata Theory – Z. Kohavi , 2nd Ed., 2001, TMH
2. Digital Design – Morris Mano, M.D. Ciletti, 4th Edition, PHI.
3. Digital Circuits and Logic Design – Samuel C. Lee, PHI.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
SENSORS AND ACTUATORS**

**Course Code: GR18D5104**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- Describe the criteria for selecting a sensor for a particular measurement.
- Determine characteristics of various types of mechanical sensors.
- Interpret physical principles applied in sensors and actuators.
- Identify various types of sensors including thermal, mechanical, electrical, electro mechanical and optical sensors.
- Apply the acquired knowledge to specific Sensors and Actuators related problems and projects at work.

**Course outcomes**

- Relate about the working principles and architecture of a large number of sensors and their elements
- Classify the use sensors and equipment for measuring mechanical quantities and temperature.
- Apply the architecture and working principles of the most common electrical motor types.
- Identify and discriminate various electrical drives and actuators.
- Analyze and interpret in an active way with the specialists in these areas.

**Unit I: SENSORS / TRANSDUCERS**

Principles – Classification – Parameters – Characteristics – Environmental Parameters (EP) – Characterization

**Mechanical and Electromechanical Sensors:** Introduction – Resistive Potentiometer – Strain Gauge – Resistance Strain Gauge – Semiconductor Strain Gauges - Inductive Sensors: Sensitivity and Linearity of the Sensor – Types – Capacitive Sensors: – Electrostatic Transducer – Force/Stress Sensors Using Quartz Resonators – Ultrasonic Sensors.

**Unit II: THERMAL SENSORS**

Introduction – Gas thermometric Sensors – Thermal Expansion Type Thermometric Sensors – Acoustic Temperature Sensor – Dielectric Constant and Refractive Index thermosensors – Helium Low Temperature Thermometer – Nuclear Thermometer – Magnetic Thermometer – Resistance Change Type Thermometric Sensors – Thermoemf Sensors – Junction Semiconductor Types – Thermal Radiation Sensors – Quartz Crystal Thermoelectric

Sensors – NQR Thermometry – Spectroscopic Thermometry – Noise Thermometry – Heat Flux Sensors  
Magnetic sensors: Introduction – Sensors and the Principles Behind – Magneto-resistive Sensors – Anisotropic Magnetoresistive Sensing – Semiconductor Magnetoresistors – Hall Effect and Sensors – Inductance and Eddy Current Sensors – Angular/Rotary Movement Transducers – Synchros – Synchro-resolvers – Eddy Current Sensors – Electromagnetic Flowmeter – Switching Magnetic Sensors SQUID Sensors

### **Unit III: RADIATION SENSORS**

Introduction – Basic Characteristics – Types of Photosensistors/Photodetectors – X-ray and Nuclear Radiation Sensors – Fiber Optic Sensors  
Electro analytical Sensors: Introduction – The Electrochemical Cell – The Cell Potential – Standard Hydrogen Electrode (SHE) – Liquid Junction and Other Potentials – Polarization – Concentration Polarization – Reference Electrodes – Sensor Electrodes – Electro ceramics in Gas Media .

### **Unit IV: SMART SENSORS**

Introduction – Primary Sensors – Excitation – Amplification – Filters – Converters – Compensation – Information Coding/Processing – Data Communication – Standards for Smart Sensor Interface – The Automation Sensors – Applications: Introduction – On-board Automobile Sensors (Automotive Sensors) – Home Appliance Sensors – Aerospace Sensors – Sensors for Manufacturing – Sensors for environmental Monitoring.

### **Unit V: ACTUATORS**

Pneumatic and Hydraulic Actuation Systems- Actuation systems – Pneumatic and hydraulic systems – Directional Control valves – Pressure control valves – Cylinders – Servo and proportional control valves – Process control valves – Rotary actuators  
Mechanical Actuation Systems- Types of motion – Kinematic chains – Cams – Gears – Ratchet and pawl – Belt and chain drives – Bearings – Mechanical aspects of motor selection  
Electrical Actuation Systems- Electrical systems – Mechanical switches – Solid-state switches Solenoids – D.C. Motors – A.C. motors – Stepper motors

### **Text Books**

1. D. Patranabis – “Sensors and Transducers” – PHI Learning Private Limited.
2. W. Bolton – “Mechatronics” – Pearson Education Limited.

### **Reference Books**

1. Sensors and Actuators – D. Patranabis – 2nd Ed., PHI, 2013.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
EMBEDDED SYSTEM DESIGN LAB**

**Course Code: GR18D5105**

**L/T/P/C: 0/0/4/2**

**Course objectives**

- To impart the knowledge on TivaC Launchpad Board & its programming
- To extract the features of ARM processor and interfacing with different peripherals.
- To understand the use of RTOS with ARM processor on Energia IDE.
- To understand concept of SPI and I2C protocols.
- To develop an application with ARM processor.

**Course outcomes:** The students will be able to

- Acquire the knowledge on Tiva C launchpad board & its programming.
- Work on TIVA C launch pad board.
- Interface different peripherals with TIVA C launchpad.
- Develop various applications using SPI and I2C Protocols.
- Define and Design a project on the exposure with ARM processor.

**Task1**

Program to configure and control General Purpose Input/output (GPIO) Port pins of TIVA C Launchpad.

**Task2**

Program to interface Analog signals with ARM.

**Task3**

Program to Sample the sound using a microphone and display the sound levels.

**Task4**

Program to interface EEPROM with ARM using I2C protocol.

**Task5**

Program to interface I2C Temperature sensor with ARM.

**Task6**

Program to interface Accelerometer with ARM.

**Task7**

Program to interface 128x32 pixel OLED display with ARM.

**Task8**

Program to demonstrate external interrupt handling.

**Task9**

Program to interface Real Time Clock with ARM.

**Task10**

Program to interface GSM Module with ARM board for sending SMS.

**Task11**

Program to interface Biomedical sensor with ARM.

**Task12**

Program to Port RTOS on to ARM development board.

**Note**

- Minimum of 10 experiments have to be conducted.
- The following programs have to be tested on TIVA C Launchpad(ARM Cortex-M4-based microcontroller)/equivalent using Embedded C Language on Energia IDE or Equivalent.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
MICROCONTROLLERS LAB**

**Course Code: GR18D5106**

**L/T/P/C: 0/0/4/2**

**Course objectives**

- To impart the knowledge of ARM processor architecture & its programming
- To extract the features of ARM processor and interfacing with different peripherals.
- To understand the concept of Embedded C and ARM programming.
- To understand the concept of Embedded web server
- To develop wireless based applications using ARM.

**Course outcomes:** The students will be able to

- Acquire the knowledge of ARM Processor architecture & its programming.
- Develop an application in Arduino IDE using ARM.
- Interface ARM Processor with different peripherals.
- Implement Ethernet based server using ARM.
- Implement a wireless based appliance control system.

**Task1**

Program to configure and control General Purpose Input/output (GPIO) port pins of ARM.

**Task2**

Program for UART-Echo test.

**Task3**

Program to get analog input from Temperature sensor and display the temperature value on PC.

**Task4**

Program to interface LCD with ARM for displaying a message on it.

**Task5**

Program to implement RFID based access control system.

**Task6**

Program to Develop Bluetooth based monitoring and appliance control System.

**Task7**

Program for wireless based data transfer using Zigbee.

**Task8**

Program for generation of PWM signal.

**Task9**

Program to implement the Embedded Web Server using Ethernet module.

**Task10**

Program for reading and writing of a file on SD card.

**Task11**

Program to Interface SD card module with ARM to produce Audio output on speaker.

**Task12**

Program to interface USB based mouse/keyboard with ARM.

**Note:**

- Minimum of 10 experiments have to be conducted.
- Experiments to be carried out on ARM based board (Arduino Due-ATMEL SAM3X8E ARM Cortex –M3 CPU) or equivalent using Embedded C Language on Arduino IDE or Equivalent.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**RESEARCH METHODOLOGY AND IPR**

**Course Code:**

**L/T/P/C: 2/0/0/2**

**Course objectives**

**Course outcomes**

- Understand research problem formulation.
- Analyse research related information
- Understand that today's world is controlled by Computer, Information Technology, but tomorrow world will be ruled by ideas, concept, and creativity.
- Understanding that when IPR would take such important place in growth of individuals & nation, it is needless to emphasis the need of information about Intellectual Property Right to be promoted among students in general & engineering in particular.
- Understand that IPR protection provides an incentive to inventors for further research work and investment in R & D, which leads to creation of new and better products, and in turn brings about, economic growth and social benefits.

**Unit I**

Meaning of research problem, Sources of research problem, Criteria Characteristics of a good research problem, Errors in selecting a research problem, Scope and objectives of research problem. Approaches of investigation of solutions for research problem, data collection, analysis, interpretation, Necessary instrumentations

**Unit II**

Effective literature studies approaches, analysis Plagiarism, Research ethics,

**Unit III**

Effective technical writing, how to write report, Paper Developing a Research Proposal, Format of research proposal, a presentation and assessment by a review committee.

**Unit IV**

Nature of Intellectual Property: Patents, Designs, Trade and Copyright. Process of Patenting and Development: technological research, innovation, patenting, development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents, Patenting under PCT.

## **Unit V**

Patent Rights: Scope of Patent Rights. Licensing and transfer of technology. Patent information and databases. Geographical Indications.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
EMBEDDED NETWORKING**

**Course Code: GR18D5107**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To study various embedded communication protocols.
- To learn USB and CAN bus protocols.
- To know the basics of Ethernet module.
- To understand the concept of embedded web server.
- To familiarize about wireless sensor networks.

**Course outcomes**

- Differentiate serial and parallel communication protocols.
- Design and develop an application using USB and CAN Protocols
- Demonstrate working principle of Ethernet module.
- Write a HTML code for creating webpages.
- Develop an application for serving webpages with dynamic data.

**Unit I: EMBEDDED COMMUNICATION PROTOCOLS**

Embedded Networking: Introduction – Serial/Parallel Communication – Serial communication protocols -RS232 standard – RS485 – Synchronous Serial Protocols -Serial Peripheral Interface (SPI) – Inter Integrated Circuits (I2C) – PC Parallel port programming - ISA/PCI Bus protocols – Fire wire.

**Unit II: USB AND CAN BUS**

USB bus – Introduction – Speed Identification on the bus – USB States – USB bus communication: Packets –Data flow types –Enumeration –Descriptors –PIC 18 Microcontroller USB Interface – C Programs –CAN Bus – Introduction - Frames –Bit stuffing –Types of errors –Nominal Bit Timing – PIC microcontroller CAN Interface –A simple application with CAN.

**Unit III: ETHERNET BASICS**

Elements of a network – Inside Ethernet – Building a Network: Hardware options – Cables, Connections and network speed – Design choices: Selecting components –Ethernet

Controllers –Using the internet in local and internet communications – Inside the Internet protocol.

#### **Unit IV: EMBEDDED ETHERNET**

Exchanging messages using UDP and TCP – Serving web pages with Dynamic Data – Serving web pages that respond to user Input – Email for Embedded Systems – Using FTP – Keeping Devices and Network secure.

#### **Unit V: WIRELESS EMBEDDED NETWORKING**

Wireless sensor networks – Introduction – Applications – Network Topology – Localization – Time Synchronization - Energy efficient MAC protocols –SMAC – Energy efficient and robust routing –Data Centric routing.

#### **Text Books**

1. Embedded Systems Design: A Unified Hardware/Software Introduction - Frank Vahid, Tony Givargis, John & Wiley Publications, 2002
2. Parallel Port Complete: Programming, interfacing and using the PCs parallel printer port - Jan Axelson, Penram Publications, 1996.

#### **Reference Books**

1. Advanced PIC microcontroller projects in C: from USB to RTOS with the PIC18F series - Dogan Ibrahim, Elsevier 2008.
2. Embedded Ethernet and Internet Complete - Jan Axelson, Penram publications, 2003.
3. Networking Wireless Sensors - BhaskarKrishnamachari, Cambridge press 2005.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**  
**DIGITAL SIGNAL PROCESSORS**

**Course Code: GR18D5108**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To provide sound foundation of digital signal processing (DSP) architectures for designing efficient VLSI architectures for DSP systems.
- To analyze general purpose digital signal processors.
- To understand pipelining, parallel processing and retiming.
- To illustrate the features of on-chip peripheral devices and its interfacing along with its programming details.
- To analyze DSP architectures.

**Course outcomes**

- An ability to design analog and digital filters for signal-processing applications.
- An ability to learn the architecture details and instruction sets of fixed and floating point DSPs.
- An ability to analyze and learn to implement the signal processing algorithms in DSPs.
- An ability to learn the DSP programming tools and use them for applications.
- An ability to design and implement signal processing modules in DSPs.

**Unit I: INTRODUCTION TO DIGITAL SIGNAL PROCESSING**

Introduction, a Digital signal-processing system, the sampling process, discrete time sequences. Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT), Linear time-invariant systems, Digital filters, Decimation and interpolation. Computational Accuracy in DSP Implementations: Number formats for signals and coefficients in DSP systems, Dynamic Range and Precision, Sources of error in DSP implementations, A/D Conversion errors, DSP Computational errors, D/A Conversion Errors, Compensating filter.

**Unit II: ARCHITECTURES FOR PROGRAMMABLE DSP DEVICES**

Basic Architectural features, DSP Computational Building Blocks, Bus Architecture and Memory, Data Addressing Capabilities, Address Generation UNIT, Programmability and Program Execution, Speed Issues, Features for External interfacing.

**Unit III: PROGRAMMABLE DIGITAL SIGNAL PROCESSORS**

Commercial Digital signal-processing Devices, Data Addressing modes of TMS320C54XX DSPs, Data Addressing modes of TMS320C54XX Processors, Memory space of TMS320C54XX Processors, Program Control, TMS320C54XX Instructions and Programming, On-Chip Peripherals, Interrupts of TMS320C54XX Processors, Pipeline Operation of TMS320C54XX Processors.

#### **Unit IV: ANALOG DEVICES FAMILY OF DSP DEVICES**

Analog Devices Family of DSP Devices – ALU and MAC block diagram, Shifter Instruction, Base Architecture of ADSP 2100, ADSP-2181 high performance Processor. Introduction to Black fin Processor - The Black fin Processor, Introduction to Micro Signal Architecture, Overview of Hardware Processing Units and Register files, Address Arithmetic Unit, Control Unit, Bus Architecture and Memory, Basic Peripherals.

#### **Unit V: INTERFACING MEMORY AND I/O PERIPHERALS TO PROGRAMMABLE DSP DEVICES**

Memory space organization, External bus interfacing signals, Memory interface, Parallel I/O interface, Programmed I/O, Interrupts and I/O, Direct memory access (DMA).

#### **Text Books**

1. Digital Signal Processing – Avtar Singh and S. Srinivasan, Thomson Publications, 2004.
2. A Practical Approach To Digital Signal Processing - K Padmanabhan, R. Vijayarajeswaran, Ananthi. S, New Age International, 2006/2009
3. Embedded Signal Processing with the Micro Signal Architecture: Woon-Seng Gan, Sen M.Kuo, Wiley-IEEE Press, 2007

#### **Reference Books**

1. Digital Signal Processors, Architecture, Programming and Applications – B. Venkataramani and M. Bhaskar, 2002, TMH.
2. Digital Signal Processing – Jonatham Stein, 2005, John Wiley.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
HARDWARE SOFTWARE CO-DESIGN**

**Course Code: GR18D5093**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- Describe an embedded system design flow from specification to physical realization
- Describe structural behavior of systems.
- Master complex systems.
- Devise new theories, techniques, and tools in design, implementation and testing.
- Master contemporary development techniques.

**Course outcomes**

- Gain knowledge of contemporary issues and algorithms used.
- Know the interfacing components, different verification techniques and tools.
- Demonstrate practical skills in the construction of prototypes.
- Understand the use of modern hardware and software tools for building prototypes of embedded systems.
- Apply embedded software techniques to satisfy functional and response time requirements.

**Unit I: CO- DESIGN ISSUES**

Co- Design Models, Architectures, Languages, A Generic Co-design Methodology.

**Co- Synthesis algorithms**

Hardware software synthesis algorithms: hardware – software partitioning distributed system co-synthesis.

**Unit II: PROTOTYPING AND EMULATION**

Prototyping and emulation techniques, prototyping and emulation environments, future developments in emulation and prototyping architecture specialization techniques, system communication infrastructure

**Target architectures**

Architecture Specialization techniques, System Communication infrastructure, Target Architecture and Application System classes, Architecture for control dominated systems (8051-Architectures for High performance control), Architecture for Data dominated systems (ADSP21060, TMS320C60), Mixed Systems.

**Unit III: COMPILATION TECHNIQUES AND TOOLS FOR EMBEDDED PROCESSOR ARCHITECTURES**

Modern embedded architectures, embedded software development needs, compilation technologies, practical consideration in a compiler development environment.

#### **Unit IV: DESIGN SPECIFICATION AND VERIFICATION**

Design, co-design, the co-design computational model, concurrency coordinating concurrent computations, interfacing components, design verification, implementation verification, verification tools, interface verification.

#### **Unit V:**

##### **Languages For System – Level Specification And Design-I**

System – level specification, design representation for system level synthesis, system level specification languages,

##### **Languages for system – level specification and design-II**

Heterogeneous specifications and multi language co-simulation, the cosyma system and lycos system.

#### **Text Books**

1. Hardware / Software Co- Design Principles and Practice – Jorgen Staunstrup, Wayne Wolf –2009, Springer.
2. Hardware / Software Co- Design - Giovanni De Micheli, Mariagiovanna Sami, 2002, Kluwer Academic Publishers

#### **Reference Books**

1. A Practical Introduction to Hardware/Software Co-design -Patrick R. Schaumont - 2010 –Springer

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
SYSTEM ON CHIP ARCHITECTURE**

**Course Code: GR18D5089**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To describe the system design approach with respect to the hardware and software.
- To apply the techniques for reducing the delays in program execution.
- To categorize and compare different processor types for their selection into a System on Chip.
- To compare different memory designs and their purposes.
- To interpret the architectures and applications of various buses.

**Course outcomes**

- Identify and formulate a given problem in the framework of SOC based design approaches.
- Design SOC based system for engineering applications.
- Realize impact of SOC on electronic design philosophy and Macro-electronics.
- Incline towards entrepreneurship & skill development.
- To analyze and choose from different reconfigurable devices for a system on chip.

**Unit I: INTRODUCTION TO THE SYSTEM APPROACH**

System Architecture, Components of the system, Hardware & Software, Processor Architectures, Memory and Addressing. System level interconnection, An approach for SOC Design, System Architecture and Complexity.

**Unit II: PROCESSORS**

Introduction, Processor Selection for SOC, Basic concepts in Processor Architecture, Basic concepts in Processor Micro Architecture, Basic elements in Instruction handling. Buffers: minimizing Pipeline Delays, Branches, More Robust Processors, Vector Processors and Vector Instructions extensions, VLIW Processors, Superscalar Processors.

**Unit III: MEMORY DESIGN FOR SOC**

Overview of SOC external memory, Internal Memory, Size, Scratchpads and Cache memory, Cache Organization, Cache data, Write Policies, Strategies for line replacement at miss time, Types of Cache, Split – I, and D – Caches, Multilevel Caches, Virtual to real translation , SOC Memory System, Models of Simple Processor – memory interaction.

## **Unit IV: INTERCONNECT CUSTOMIZATION AND CONFIGURATION**

Inter Connect Architectures, Bus: Basic Architectures, SOC Standard Buses, Analytic Bus Models, Using the Bus model, Effects of Bus transactions and contention time. SOC Customization: An overview, Customizing Instruction Processor, Reconfiguration Technologies, Mapping design onto Reconfigurable devices, Instance-Specific design, Customizable Soft Processor, Reconfiguration - overhead analysis and trade-off analysis on reconfigurable Parallelism.

## **Unit V: APPLICATION STUDIES / CASE STUDIES**

SOC Design approach, AES algorithms, Design and evaluation, Image compression – JPEG compression.

### **Text Books**

1. Computer System Design System-on-Chip - Michael J. Flynn and Wayne Luk, Wiley India Pvt. Ltd.
2. ARM System on Chip Architecture – Steve Furber –2nd Ed., 2000, Addison Wesley Professional.

### **Reference Books**

1. Design of System on a Chip: Devices and Components – Ricardo Reis, 1st Ed., 2004, Springer
2. Co-Verification of Hardware and Software for ARM System on Chip Design (Embedded Technology) – Jason Andrews – Newnes, BK and CDROM.
3. System on Chip Verification – Methodologies and Techniques –Prakash Rashinkar, Peter Paterson and Leena Singh L, 2001, Kluwer Academic Publishers.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**  
**ADVANCED OPERATING SYSTEMS**

**Course Code: GR18D5109**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To learn the fundamentals, purpose, structure and functions of operating systems.
- To understand how the operating system abstractions can be used in the development of application programs, or to build higher level abstractions.
- To gain insight on to the distributed resource management components viz. the algorithms for implementation of distributed shared memory and commit protocols.
- To gain knowledge on Distributed operating system concepts that includes architecture, Mutual exclusion algorithms.
- To explain how to characterize and cope with processor deadlock, including prevention, avoidance, detection, and recovery.

**Course outcomes**

- An ability to describe the basic principles used in the design of modern operating systems.
- An ability to understand the difference between different types of modern operating systems, virtual machines and their structure of implementation and applications.
- An ability to understand the difference between process & thread and use of locks, semaphores, monitors for synchronizing multiprogramming with multithreaded systems.
- An ability to identify the different features of real time and mobile operating systems.
- An ability to modify existing open source kernels in terms of functionality or features used.

**Unit I: INTRODUCTION TO OPERATING SYSTEMS**

Overview of computer system hardware, Instruction execution, I/O function, Interrupts, Memory hierarchy, I/O Communication techniques, Operating system objectives and functions, Evaluation of operating System.

## **Unit II: INTRODUCTION TO UNIX AND LINUX**

Basic commands & command arguments, Standard input, output, Input / output redirection, filters and editors, Shells and operation

## **Unit III: SYSTEM CALLS**

System calls and related file structures, Input / Output, Process creation & termination. Inter Process Communication Introduction, file and record locking, Client – Server example, pipes, FIFOs, Streams & Messages, Name Spaces, Systems V IPC, Message queues, Semaphores, Shared Memory, Sockets & TLI.

## **Unit IV: INTRODUCTION TO DISTRIBUTED SYSTEMS**

Goals of distributed system, Hardware and software concepts, Design issues.

**Communication in Distributed Systems:** Layered protocols, ATM networks, Client – Server model, Remote procedure call and Group Communication.

## **Unit V: SYNCHRONIZATION IN DISTRIBUTED SYSTEMS**

Clock synchronization, Mutual exclusion, E-tech algorithms, Bully algorithm, Ring algorithm, Atomic transactions

**Deadlocks:** Dead lock in distributed systems, Distributed dead lock prevention and distributed dead lock detection.

### **Text Books**

1. The design of the UNIX Operating Systems – Maurice J. Bach, 1986, PHI.
2. Distributed Operating System - Andrew. S. Tanenbaum, 1994, PHI.
3. The Complete reference LINUX – Richard Peterson, 4th Ed., McGraw – Hill.

### **Reference Books**

1. Operating Systems: Internal and Design Principles - Stallings, 6th Ed., PE.
2. Modern Operating Systems, Andrew S Tanenbaum, 3rd Ed., PE.
3. Operating System Principles- Abraham Silberchatz, Peter B. Galvin, Greg Gagne, 7th Ed., John Wiley
4. UNIX User Guide – Ritchie & Yates.
5. UNIX Network Programming - W.Richard Stevens, 1998, PHI

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
NETWORK SECURITY**

**Course Code: GR18D5110**

**L/T/P/C: 3/0/0/3**

**Course objective**

- To provide deeper understanding into cryptography, its application to network security, threats/vulnerabilities to networks and countermeasures.
- To study various approaches to Encryption techniques, strengths of Traffic Confidentiality, Message Authentication Codes.
- To know Digital Signature Standard and provide solutions for their issues.
- To be familiar with cryptographic techniques for secure (confidential) communication of two parties over an insecure (public) channel;
- To verification of the authenticity of the source of a message.

**Course outcome**

- To outline the different OSI layers and their functionalities.
- To impart knowledge on Encryption techniques, Design Principles and Modes of Operation.
- To design a security solution for a given application
- To understand the Key Management techniques and Number Theory.
- To create an understanding of Authentication functions the manner in which Message Authentication Codes and Hash Functions works.

**Unit I: INTRODUCTION**

Attacks, Services and Mechanisms, Security attacks, Security services, A Model for Internetwork security. Classical Techniques: Conventional Encryption model, Steganography, Classical Encryption Techniques.

**Unit II: MODERN TECHNIQUES**

Simplified DES, Block Cipher Principles, Data Encryption standard, Strength of DES, Differential and Linear Cryptanalysis, Block Cipher Design Principles and Modes of operations.

**Algorithms:** Triple DES, International Data Encryption algorithm, Blowfish, RC5, CAST-128, RC2, Characteristics of Advanced Symmetric blockciphers.

**Conventional encryption:** Placement of Encryption function, Traffic confidentiality, Key distribution, Random Number Generation.

**Public key cryptography:** Principles, RSA Algorithm, Key Management, Diffie-Hellman Key exchange, Elliptic Curve Cryptography.

### **Unit III: NUMBER THEORY**

Prime and Relatively prime numbers, Modular arithmetic, Fermat's and Euler's theorems, Testing for primality, Euclid's Algorithm, the Chinese remainder theorem, Discrete logarithms.

**Message authentication and hash functions:** Authentication requirements and functions, Message Authentication, Hash functions, Security of Hash functions and MACs.

### **Unit IV: HASH AND MAC ALGORITHMS**

MD File, Message digest Algorithm, Secure Hash Algorithm, RIPEMD-160, HMAC. Digital signatures and Authentication Protocols: Digital signatures, Authentication Protocols, Digital signature standards.

**Authentication applications:** Kerberos, X.509 directory Authentication service .Electronic Mail Security: Pretty Good Privacy, S/MIME.

### **Unit V: IP SECURITY**

Overview, Architecture, Authentication, Encapsulating Security Payload, Combining security Associations, Key Management.

**Web security:** Web Security requirements, Secure sockets layer and Transport layer security, Secure Electronic Transaction. Intruders'

**Viruses and worms:** Intruders, Viruses and Related threats. Fire Walls: Fire wall Design Principles, Trusted systems.

### **Text Books**

1. Cryptography and Network Security: Principles and Practice - William Stallings, Pearson Education.

2. Network Security Essentials (Applications and Standards) by William Stallings Pearson Education.

### **Reference Books**

1. Fundamentals of Network Security by Eric Maiwald (Dreamtech press)

2. Network Security - Private Communication in a Public World by Charlie Kaufman, Radia Perlman and Mike Speciner, Pearson/PHI.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
CPLD AND FPGA ARCHITECTURES**

**Course Code: GR18D5081**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To understand the concept of Programmable Logic Device architectures and technologies.
- Underlying FPGA architectures and technologies in detail.
- To understand the difference between CPLDs and FPGAs
- To provide knowledge about SRAM Programmable FPGA Device architecture.
- To comprehend knowledge about Anti-Fuse Programmable FPGA Device architecture.

**Course outcomes**

- To know the concept of programmable architectures.
- Perceiving CPLD and FPGA technologies
- Study and compare the different architectures of CPLDs and FPGAs
- An ability to know the SRAM Technology based FPGAs
- Design and impose applications using FPGAs.

**Unit I: INTRODUCTION TO PROGRAMMABLE LOGIC DEVICES**

Introduction, Simple Programmable Logic Devices – Read Only Memories, Programmable Logic Arrays, Programmable Array Logic, Programmable Logic Devices/Generic Array Logic; Complex Programmable Logic Devices – Architecture of Xilinx Cool Runner XCR3064XL CPLD, CPLD Implementation of a Parallel Adder with Accumulation.

**Unit II: FIELD PROGRAMMABLE GATE ARRAYS**

Organization of FPGAs, FPGA Programming Technologies, Programmable Logic Block Architectures, Programmable Interconnects, Programmable I/O blocks in FPGAs, Dedicated Specialized Components of FPGAs, Applications of FPGAs.

### **Unit III: SRAM PROGRAMMABLE FPGAS**

Introduction, Programming Technology, Device Architecture, The Xilinx XC2000, XC3000 and XC4000 Architectures.

### **Unit IV: ANTI-FUSE PROGRAMMED FPGAS**

Introduction, Programming Technology, Device Architecture, The Actel ACT1, ACT2 and ACT3 Architectures.

### **Unit V: DESIGN APPLICATIONS**

General Design Issues, Counter Examples, A Fast Video Controller, A Position Tracker for a Robot Manipulator, A Fast DMA Controller, Designing Counters with ACT devices, Designing Adders and Accumulators with the ACT Architecture.

### **Text Books**

1. Field Programmable Gate Array Technology - Stephen M. Trimberger, Springer International Edition.
2. Digital Systems Design - Charles H. Roth Jr, Lizy Kurian John, Cengage Learning.

### **Reference Books**

1. Field Programmable Gate Arrays - John V. Oldfield, Richard C. Dorf, Wiley India.
2. Digital Design Using Field Programmable Gate Arrays - Pak K. Chan/Samiha Mourad, Pearson Low Price Edition.
3. Digital Systems Design with FPGAs and CPLDs - Ian Grout, Elsevier, Newnes.
4. FPGA based System Design - Wayne Wolf, Prentice Hall Modern Semiconductor Design Series.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
INTERNET OF THINGS**

**Course Code: GR18D5112**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To introduce the terminology, technology and its applications.
- Understand the concepts of Internet of Things
- Analyze basic protocols in wireless sensor network
- To introduce the implementation of web based services on IOT devices ,
- To Apply IOT to different applications

**Course outcomes**

- Understand the new computing technologies
- Able to apply the latest computing technologies like cloud computing technology and Big Data
- Ability to introduce the concept of M2M (machine to machine) with necessary protocols
- Gets the skill to program using python scripting language which is used in many IOT devices.
- Design IOT applications in different domain and be able to analyze their performance

**Unit I: INTRODUCTION TO INTERNET OF THINGS**

Definition and Characteristics of IOT, Physical Design of IOT – IOT Protocols, IOT Communication Models, IOT Communication APIs IOT enabled Technologies – Wireless Sensor Networks, Cloud Computing, Big data analytics, Communication protocols, Embedded Systems, IOT Levels and Templates Domain Specific IOTs – Home, City, Environment, Energy, Retail, Logistics, Agriculture, Industry, Health and Lifestyle

**Unit II: IOT AND M2M**

Software defined networks, network function virtualization, difference between SDN and NFV for IOT Basics of IOT System Management with NETCOZF, YANGNETCONF, YANG, SNMP NETOPEER

**Unit III: INTRODUCTION TO PYTHON**

Language features of Python, Data types, data structures, Control of flow, functions, modules, packaging, file handling, data/time operations, classes, Exception handling Python packages - JSON, XML, HTTPLib, URLLib, SMTPLib

#### **Unit IV: IOT PHYSICAL DEVICES AND ENDPOINTS**

Introduction to Raspberry PI-Interfaces (serial, SPI, I2C) Programming – Python program with Raspberry PI with focus of interfacing external gadgets, controlling output, reading input from pins.

#### **Unit V: IOT PHYSICAL SERVERS AND CLOUD OFFERINGS**

Introduction to Cloud Storage models and communication APIs Web server – Web server for IOT, Cloud for IOT, Python web application framework Designing a REST ful web API Text Books: 1. Internet of Things - A Hands-on Approach, Arshdeep Bahga and Vijay Madisetti, Universities Press, 2015, ISBN: 9788173719547 2. Getting Started with Raspberry Pi, Matt Richardson & Shawn Wallace, O'Reilly (SPD), 2014, ISBN: 9789350239759

#### **References Books**

1. Kevin Murphy, Machine Learning: A Probabilistic Perspective, MIT Press, 2012
2. Trevor Hastie, Robert Tibshirani, Jerome Friedman, The Elements of Statistical Learning, Springer 2009 (freely available online)
3. Christopher Bishop, Pattern Recognition and Machine Learning, Springer, 2007.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
EMBEDDED C LAB**

**Course Code: GR18D5113**

**L/T/P/C: 0/0/4/2**

**Course objectives**

- To impart the knowledge on WiFi based Board & its programming
- To extract the features of WiFi based Board and interfacing with different peripherals.
- To learn the concepts of IOT.
- To learn different protocols used in IOT.
- To Apply IOT to different applications

**Course outcomes:** The students will be able to

- Programming on NODE MCU /WiFi based board.
- Implement WiFi based web server.
- Understand the concepts of Internet of Things
- Analyze basic protocols in wireless sensor network
- Design IOT applications in different domain and be able to analyze their performance

**Task1**

Program to Interface sensors (DHT11 and LDR) with WiFi based board and display the sensor values on PC.

**Task2**

Program to control the appliances using Relay module.

**Task3**

Program to implement WiFi based Web Server.

**Task4**

Program to send sensors data to cloud using WiFi module.

**Task5**

Program to implement IOT based appliance control system.

**Task6**

Program to send alert using internet when sensor readings are abnormal.

**Task7**

Program to demonstrate mobile app Development.

**Task8**

Program to implement IoT based motion detector using WiFi module and android app.

**Task9**

Program to implement GISMO as Zigbee to WiFi Gateway.

**Task10**

Program to implement GISMO as Bluetooth to WiFi Gateway.

**Task11**

Program to implement IOT based Scrolling Display.

**Task12**

Program to implement IOT based health care monitoring and alert system

**Note:**

- Minimum of 10 experiments have to be conducted.
- The following programs have to be tested on GISMO IV (GRIET IoT Sensor Module) Board or NODE MCU (WiFi based board)/equivalent using Embedded C Language on Arduino IDE or equivalent.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
DIGITAL SIGNAL PROCESSORS LAB**

**Course Code: GR18D5114**

**L/T/P/C: 0/0/4/2**

**Course objectives**

- To analyze the basic signal processing operations for DSP systems.
- To learn the frequency response of filters.
- To understand the architecture of TMS32054xx processor.
- To comprehend the programming of TMS32054xx processor.
- To familiarize the different addressing modes of TMS32054xx processor.

**Course outcomes**

- To design analog and digital filters.
- To perform decimation and interpolation.
- To analyze the spectral characteristics of digital signals.
- To design and implement signal processing modules using
- To generate various signals on TMS32054xx processor TMS32054xx processor.

**Task1**

Discrete and Fast Fourier transform (DFT, FFT) representation for a given sequence.

**Task2**

Frequency response and time-domain simulation of FIR low pass and high pass filters.

**Task3**

Frequency response and time-domain simulation of IIR low pass and high pass filters.

**Task4**

Implementation of Decimation Process.

**Task5**

Implementation of Interpolation Process.

**Task6**

Estimation of Power Spectral Density.

**Task7**

Basic programs on TMS32054xx processor for familiarizing the arithmetic instructions.

**Task8**

Waveform/Signal generation on TMS32054xx processor using look up tables.

**Task9**

Programs on different addressing modes of TMS32054xx processor.

**Task10**

FIR and IIR filter implementation using TMS32054xx processor.

**Task11**

Programs on TMS32054xx processor for processing real time signals.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY  
ARTIFICIAL NEURAL NETWORKS AND FUZZY SYSTEMS**

**Course Code: GR18D5115**

**L/T/P/C: 3/0/0/3**

**Course objective**

- To cater the knowledge of Neural Networks and Fuzzy Logic Control and use these for controlling real time systems.
- To know about feedback networks.
- To learn about the concept of fuzziness involved in various systems
- To understand the concept of adequate knowledge about fuzzy set theory.
- To learn about comprehensive knowledge of fuzzy logic control and adaptive fuzzy logic and to design the fuzzy control using genetic algorithm

**Course outcomes**

- To Expose the students to the concepts of feed forward neural networks
- To provide adequate knowledge about feedback networks.
- To teach about the concept of fuzziness involved in various systems.
- To provide adequate knowledge about fuzzy set theory.
- To provide comprehensive knowledge of fuzzy logic control and adaptive fuzzy logic and to design the fuzzy control using genetic algorithm.

**Unit I: INTRODUCTION TO NEURAL NETWORKS**

Introduction, Humans and Computers, Organization of the Brain, Biological Neuron, Biological and Artificial Neuron Models, Hodgkin-Huxley Neuron Model, Integrate-and-Fire Neuron Model, Spiking Neuron Model, Characteristics of ANN, McCulloch-Pitts Model, Historical Developments, Potential Applications of ANN.

**Unit II: ESSENTIALS OF ARTIFICIAL NEURAL NETWORKS**

Artificial Neuron Model, Operations of Artificial Neuron, Types of Neuron Activation Function, ANN Architectures, Classification Taxonomy of ANN – Connectivity, Neural

Dynamics (Activation and Synaptic), Learning Strategy (Supervised, Unsupervised, Reinforcement), Learning Rules, Types of Application

### **FEED FORWARD NEURAL NETWORKS**

Introduction, Perceptron Models: Discrete, Continuous and Multi-Category, Training Algorithms: Discrete and Continuous Perceptron Networks, Perceptron Convergence theorem, Limitations of the Perceptron Model, Applications.

### **Unit III: MULTILAYER FEED FORWARD NEURAL NETWORKS**

Credit Assignment Problem, Generalized Delta Rule, Derivation of Backpropagation (BP) Training, Summary of Backpropagation Algorithm, Kolmogorov Theorem, Learning Difficulties and Improvements.

#### **ASSOCIATIVE MEMORIES**

Paradigms of Associative Memory, Pattern Mathematics, Hebbian Learning, General Concepts of Associative Memory (Associative Matrix, Association Rules, Hamming Distance, The Linear Associator, Matrix Memories, Content Addressable Memory), Bidirectional Associative Memory (BAM) Architecture, BAM Training Algorithms: Storage and Recall Algorithm, BAM Energy Function, Proof of BAM Stability Theorem  
Architecture of Hopfield Network: Discrete and Continuous versions, Storage and Recall Algorithm, Stability Analysis, Capacity of the Hopfield Network.

### **Unit IV: SELF-ORGANIZING MAPS (SOM) AND ADAPTIVE RESONANCE THEORY (ART)**

Introduction, Competitive Learning, Vector Quantization, Self-Organized Learning Networks, Kohonen Networks, Training Algorithms, Linear Vector Quantization, Stability-Plasticity Dilemma, Feed forward competition, Feedback Competition, Instar, Outstar, ART1, ART2, Applications. **Classical & Fuzzy Sets** Introduction to classical sets - properties, Operations and relations; Fuzzy sets, Membership, Uncertainty, Operations, properties, fuzzy relations, cardinalities, membership functions.

### **Unit V: FUZZY LOGIC SYSTEM COMPONENTS**

Fuzzification, Membership value assignment, development of rule base and decision making system, Defuzzification to crisp sets, Defuzzification methods. **Applications**

**Neural network applications:** Process identification, Function Approximation, control and Process Monitoring, fault diagnosis and load forecasting. **Fuzzy logic applications:** Fuzzy logic control and Fuzzy classification.

### **Text Books**

1. Neural Networks, Fuzzy logic, Genetic algorithms: synthesis and applications by Rajasekharan and Rai – PHI Publication.
2. Introduction to Artificial Neural Systems - Jacek M. Zurada, Jaico Publishing House, 1997.

### **Reference Books**

1. Neural and Fuzzy Systems: Foundation, Architectures and Applications, - N. Yadaiah and S. Bapi Raju, Pearson Education
2. Neural Networks – James A Freeman and Davis Skapura, Pearson, 2002.
3. Neural Networks – Simon Hykins , Pearson Education
4. Neural Engineering by C.Eliasmith and CH.Anderson, PHI
5. Neural Networks and Fuzzy Logic System by Bork Kosko, PHI Publications.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**SENSOR NETWORKS**

**Course Code: GR18D5116**

**L/T/P/C: 3/0/0/3**

**Course objective**

- To develop an understanding of sensor network architectures from a design and performance perspective.
- To understand the layered approach in sensor networks starting from physical layer to application layer.
- To study the WSN protocols.
- To study TinyOS and Contiki.
- To get adequate exposure to emerging technologies and their potential impact.

**Course outcomes**

- Differentiate MAC layer protocols
- Identify different issues in wireless ad hoc and sensor networks
- Know about routing in WSN.
- To analyze protocols developed for ad hoc and sensor networks
- To identify and understand security issues in ad hoc and sensor networks

**Unit I: MAC & ROUTING IN AD HOC NETWORKS**

Introduction – Issues and challenges in ad hoc networks – MAC Layer Protocols for wireless ad hoc networks – Contention-Based MAC protocols – MAC Protocols Using Directional Antennas – Multiple-Channel MAC Protocols – Power-Aware MAC Protocols – Routing in Ad hoc Networks – Design Issues – Proactive, Reactive and Hybrid Routing Protocols.

**Unit II: TRANSPORT & QOS IN AD HOC NETWORKS**

TCP's challenges and Design Issues in Ad Hoc Networks – Transport protocols for ad hoc networks – Issues and Challenges in providing QoS – MAC Layer QoS solutions – Network Layer QoS solutions – QoS Model.

### **Unit III: MAC & ROUTING IN WIRELESS SENSOR NETWORKS**

Introduction – Applications – Challenges – Sensor network architecture – MAC Protocols for wireless sensor networks – Low duty cycle protocols and wakeup concepts – Contention-Based protocols – Schedule-Based protocols – IEEE 802.15.4 Zig bee – Topology Control – Routing Protocols.

### **Unit IV: TRANSPORT & QOS IN WIRELESS SENSOR NETWORKS**

Data-Centric and Contention-Based Networking – Transport Layer and QoS in Wireless Sensor Networks – Congestion Control – In-network processing – Operating systems for wireless sensor networks – Examples.

### **Unit V: SECURITY IN AD HOC AND SENSOR NETWORKS**

Security Attacks – Key Distribution and Management – Intrusion Detection – Software based Antitamper techniques – Water marking techniques – Defense against routing attacks - Secure Ad hoc routing protocols – Broadcast authentication WSN protocols – TESLA – Biba – Sensor Network Security Protocols – SPINS.

### **Text Books**

1. KazemSohraby, Daniel Minoli and TaiebZnati, “ Wireless Sensor Networks Technology, Protocols, and Applications“, John Wiley & Sons, 2007.
2. Holger Karl and Andreas Willig, “Protocols and Architectures for Wireless Sensor Networks”, John Wiley & Sons, Ltd, 2005.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**MULTIMEDIA SIGNAL CODING**

**Course Code: GR18D5117**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To introduce the fundamental principles and techniques in multimedia signal processing and Compression
- Overview of current multimedia standards and technologies
- To understand and differentiate text, image, video & audio
- understand the basics of analog and digital video: video representation and transmission
- Analyse analog and digital video signals and systems

**Course outcomes**

- Understand the fundamentals behind multimedia signal processing and compression
- Understand the basic principles behind existing multimedia compression and communication
- differentiate multimedia and non-multimedia
- differentiate text, image, video & audio
- design and develop multimedia systems according to the requirements of multimedia applications

**Unit I: INTRODUCTION TO MULTIMEDIA**

Multimedia, World Wide Web, Overview of Multimedia Tools, Multimedia Authoring, Graphics/ Image Data Types, and File Formats.

**Color in image and video:** Color Science – Image Formation, Camera Systems, Gamma Correction, Color Matching Functions, CIE Chromaticity Diagram, Color Monitor Specifications, Outof- Gamut Colors, White Point Correction, XYZ to RGB Transform, Transform with Gamma Correction, L\*A\*B\* Color Model. Color Models in Images – RGB Color Model for CRT Displays, Subtractive Color: CMY Color Model, Transformation from RGB to CMY, Under Color Removal: CMYK System, Printer Gamuts, Color Models in Video – Video Color Transforms, YUV Color Model, YIQ Color Model, YcberColor Model.

**Unit II: VIDEO CONCEPTS**

Types of Video Signals, Analog Video, Digital Video. Audio Concepts: Digitization of Sound, Quantization and Transmission of Audio.

**Unit III: COMPRESSION ALGORITHMS**

Lossless Compression Algorithms: Run Length Coding, Variable Length Coding, Arithmetic

Coding, Lossless JPEG, Image Compression.

**Lossy Image Compression Algorithms:** Transform Coding: KLT And DCT Coding, Wavelet Based Coding.

**Image Compression Standards:** JPEG and JPEG2000.

#### **Unit IV: VIDEO COMPRESSION TECHNIQUES**

Introduction to Video Compression, Video Compression Based on Motion Compensation, Search for Motion Vectors, H.261- Intra-Frame and Inter-Frame Coding, Quantization, Encoder and Decoder, Overview of MPEG1 and MPEG2.

#### **Unit V: AUDIO COMPRESSION TECHNIQUES**

ADPCM in Speech Coding, G.726 ADPCM, Vocoders – Phase Insensitivity, Channel Vocoder, Formant Vocoder, Linear Predictive Coding, CELP, Hybrid Excitation Vocoders, MPEG Audio – MPEG Layers, MPEG Audio Strategy, MPEG Audio Compression Algorithms, MPEG-2 AAC, MPEG-4 Audio.

#### **Text Books**

1. Fundamentals of Multimedia – Ze- Nian Li, Mark S. Drew, PHI, 2010.
2. Multimedia Signals & Systems – Mrinal Kr. Mandal Springer International Edition 1st Edition, 2009

#### **Reference Books**

3. Multimedia Systems John F. Koegel Buford Pearson Education (LPE), 1st Edition, 2003.
4. Digital Video Processing – A. Murat Tekalp, PHI, 1996.

# GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY

## BUSINESS ANALYTICS

Course Code: GR18D5201

L/T/P/C: 3/0/0/3

### Course objectives

- Understand the role of business analytics and statistical tools used within an organization.
- Discuss Trendiness and Regression Analysis and different visualization techniques to explore data.
- Describe the organization structure and different type of business analytics.
- Know Forecasting Techniques, Monte Carlo Simulation and Risk Analysis.
- Understanding decision analysis and recent trends in business intelligence.

### Course outcomes

- Demonstrate business analytics process and use statistical tools for implementation of business process.
- Design relationships and trends to explore and visualize the data.
- Examine the organization structure of business analytics and categorize types of analytics.
- Apply forecasting techniques, monte carlo simulation and risk analysis.
- Formulate decision analysis and summarize recent trends in business intelligence.

### Unit I: BUSINESS ANALYTICS

Overview of Business analytics, Scope of Business analytics, Business Analytics Process, Relationship of Business Analytics Process and organization, competitive advantages of Business Analytics. Statistical Tools: Statistical Notation, Descriptive Statistical methods, Review of probability distribution and data modelling, sampling and estimation methods overview.

### Unit II: TRENDINESS AND REGRESSION ANALYSIS

Modelling Relationships and Trends in Data, simple Linear Regression. Important Resources, Business Analytics Personnel, Data and models for Business analytics, problem solving, Visualizing and Exploring Data, Business Analytics Technology.

### Unit III: ORGANIZATION STRUCTURES OF BUSINESS ANALYTICS TEAM MANAGEMENT

Management Issues, Designing Information Policy, Outsourcing, Ensuring Data Quality, Measuring contribution of Business analytics, Managing Changes.

Descriptive Analytics, predictive analytics, predicative Modelling, Predictive analytics analysis, Data Mining, Data Mining Methodologies, Prescriptive analytics and its step in the business analytics Process, Prescriptive Modelling, nonlinear Optimization.

### Unit IV: FORECASTING TECHNIQUES

Qualitative and Judgmental Forecasting, Statistical Forecasting models, Forecasting Models

for Stationary Time Series, Forecasting Models for Time Series with a Linear Trend, Forecasting Time Series with Seasonality, Regression Forecasting with Casual Variables, Selecting Appropriate Forecasting Models .Monte Carlo Simulation and Risk Analysis: Monte Carle Simulation Using Analytic Solver Platform, New-Product Development Model, Newsvendor Model, Overbooking Model, Cash Budget Model.

## **UNIT V: DECISION ANALYSIS**

Formulating Decision Problems, Decision Strategies with the without Outcome Probabilities, Decision Trees, The Value of Information, Utility and Decision Making. Recent Trends in: Embedded and collaborative business intelligence, Visual data recovery, Data Storytelling and Data journalism.

### **Reference Books**

1. Business analytics Principles, Concepts, and Applications by Marc J. Schniederjans, Dara G. Schniederjans, Christopher M. Starkey, Pearson FTPress.
2. Business Analytics by James Evans, persons Education.

# GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY

## INDUSTRIAL SAFETY

Course Code: GR18D5202

L/T/P/C: 3/0/0/3

### Course objectives

- To understand the importance of maintaining a safe workplace.
- To maintain safety standards in compliance with regulatory requirements and within engineering limits understand personal safety and industrial safety.
- To create a job safety analysis (JSA) for a given work project.
- To follow safety recordkeeping and management, and the role of the safety manager.
- To utilize personal proactive equipment.

**Course outcomes:** After successful completion of the course the student will be able to

- Understanding of safety principles.
- Analyze different types of exposure and biological effects, exposure guidelines and basic workplace monitoring ability to do hazard analysis.
- Demonstrate an understanding of workplace injury prevention, risk management, and incident investigations.
- Understand the acute and chronic health effects of exposure to chemical, physical and biological agents in the workplace.
- Demonstrate knowledge of the types of hazards, planning, organization and training needed to work safely with hazardous materials.

### Unit I: INDUSTRIAL SAFETY

Accident, causes, types, results and control, mechanical and electrical hazards, types, causes and preventive steps/procedure, describe salient points of factories act 1948 for health and safety, wash rooms, drinking water layouts, light, cleanliness, fire, guarding, pressure vessels, etc, Safety color codes. Fire prevention and firefighting, equipment and methods.

### Unit II: FUNDAMENTALS OF MAINTENANCE ENGINEERING

Definition and aim of maintenance engineering, Primary and secondary functions and responsibility of maintenance department, Types of maintenance, Types and applications of tools used for maintenance, Maintenance cost & its relation with replacement economy, Service life of equipment.

### Unit III: WEAR AND CORROSION AND THEIR PREVENTION

Wear- types, causes, effects, wear reduction methods, lubricants-types and applications, Lubrication methods, general sketch, working and applications, i. Screw down grease cup, ii. Pressure grease gun, iii. Splash lubrication, iv. Gravity lubrication, v. Wick feed lubrication vi. Side feed lubrication, vii. Ring lubrication, Definition, principle and factors affecting the corrosion. Types of corrosion, corrosion prevention methods.

### Unit IV: FAULT TRACING

Fault tracing-concept and importance, decision tree concept, need and applications, sequence of fault finding activities, show as decision tree, draw decision tree for problems in machine tools, hydraulic, pneumatic, automotive, thermal and electrical equipment's like, I. Any one Machine tool, ii. Pump iii. Air compressor, iv. Internal combustion engine, v. Boiler, vi. Electrical motors, Types of faults in machine tools and their general causes.

#### **Unit V: PERIODIC AND PREVENTIVE MAINTENANCE**

Periodic inspection-concept and need, degreasing, cleaning and repairing schemes, overhauling of mechanical components, overhauling of electrical motor, common troubles and remedies of electric motor, repair complexities and its use, definition, need, steps and advantages of preventive maintenance. Steps/procedure for periodic and preventive maintenance of: I. Machine tools, ii. Pumps, iii. Air compressors, iv. Diesel generating (DG) sets, Program and schedule of preventive maintenance of mechanical and electrical equipment, advantages of preventive maintenance. Repair cycle concept and importance

#### **Reference Books**

1. Maintenance Engineering Handbook, Higgins & Morrow, Da Information Services.
2. Maintenance Engineering, H. P. Garg, S. Chand and Company.
3. Pump-hydraulic Compressors, Audels, Mcgrew Hill Publication.
4. Foundation Engineering Handbook, Winterkorn, Hans, Chapman & Hall London.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**OPERATIONS RESEARCH**

**Course Code: GR18D5203**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To define and formulate linear and non-linear programming problems and appreciate their limitations arising from a wide range of applications.
- To perform sensitivity analysis to determine the direction and magnitude of change of a model's optimal solution as the data change.
- To distinguish various inventory models and develop proper inventory policies.
- To solve the scheduling and sequencing models.
- To understand how to model and solve problems using dynamic programming, game theory.

**Course outcomes**

- The student will formulate and solve problems as networks and graphs for optimal allocation of limited resources such as machine, material and money.
- The student will be able to carry out sensitivity analysis.
- The student will solve network models like the shortest path, minimum spanning tree, and maximum flow problems.
- The student will be able to distinguish various inventory models and develop proper inventory policies.
- The student will also propose the best strategy using decision making methods under uncertainty and game theory.

**Unit I**

Optimization Techniques, Model Formulation, models, General L.R Formulation, Simplex Techniques, Sensitivity Analysis, Inventory Control Models.

**Unit II**

Formulation of a LPP - Graphical solution revised simplex method - duality theory - dual simplex method - sensitivity analysis - parametric programming.

**Unit III**

Nonlinear programming problem - Kuhn-Tucker conditions min cost flow problem - max flow problem - CPM/PERT

**Unit IV**

Scheduling and sequencing - single server and multiple server models - deterministic inventory models - Probabilistic inventory control models - Geometric Programming.

**Unit V**

Competitive Models, Single and Multi-channel Problems, Sequencing Models, Dynamic Programming, Flow in Networks, Elementary Graph Theory, Game Theory Simulation.

6. Harvey M Wagner, Principles of Operations Research: Prentice Hall of India2010

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**COST MANAGEMENT OF ENGINEERING PROJECTS**

**Course Code: GR18D5204**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To provide the student with a clear understanding of strategic cost management process.
- To describe the various stages of project execution.
- To prepare the project schedule by bar charts and network diagram.
- To conduct breakeven and cost-volume-profit analysis.
- To make students various budgets and quantitative techniques used for cost management.

**Course outcomes**

- The student will be able to explain the various cost concepts used in decision making.
- To be able to identify and demonstrate various stages of project execution.
- The students will be able to prepare the project schedule by bar charts and network diagrams.
- The student will be to differentiate absorption costing and marginal costing, also conduct breakeven and cost-volume-profit analysis.
- The student will be able to prepare various budgets and quantitative techniques used for cost management.

**Unit I**

Introduction and Overview of the Strategic Cost Management Process, Cost concepts in decision-making; relevant cost, Differential cost, Incremental cost and Opportunity cost. Objectives of a Costing System; Inventory valuation; Creation of a Database for operational control; Provision of data for Decision-Making.

**Unit II**

Project: meaning, Different types, why to manage, cost overruns centers, various stages of project execution: conception to commissioning. Project execution as conglomeration of technical and non- technical activities. Detailed Engineering activities. Pre project execution

main clearances and documents Project team: Role of each member. Importance Project site: Data required with significance. Project contracts. Types and contents. Project execution Project cost control. Bar charts and Network diagram. Project commissioning: mechanical and process

### **Unit III**

Cost Behavior and Profit Planning Marginal Costing; Distinction between Marginal Costing and Absorption Costing; Break-even Analysis, Cost-Volume-Profit Analysis. Various decision-making problems. Standard Costing and Variance Analysis. Pricing strategies: Pareto Analysis. Target costing, Life Cycle Costing. Costing of service sector. Just-in-time approach, Material Requirement Planning, Enterprise Resource Planning, Total Quality Management and Theory of constraints. Activity-Based Cost Management, Bench Marking; Balanced Score Card and Value-Chain Analysis.

### **Unit IV**

Budgetary Control; Flexible Budgets; Performance budgets; Zero-based budgets. Measurement of Divisional profitability pricing decisions including transfer pricing.

### **Unit V**

Quantitative techniques for cost management, Linear Programming, PERT/CPM, Transportation problems, Assignment problems, Simulation, Learning Curve Theory.

### **Reference Books**

1. Cost Accounting A Managerial Emphasis, Prentice Hall of India, New Delhi.
2. Charles T. Horngren and George Foster, Advanced Management Accounting.
3. Robert S Kaplan Anthony A. Alkinson, Management & Cost Accounting.
4. Ashish K. Bhattacharya, Principles & Practices of Cost Accounting A. H. Wheeler publisher.

# GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY

## COMPOSITE MATERIALS

Course Code: GR18D5205

L/T/P/C: 3/0/0/3

**Course objectives:** The objectives of this course is to provide the students,

- To understand the concepts of fundamental science and engineering principles relevant to materials engineering.
- To expose the various methods to test mechanical properties on materials.
- To categorize the various equilibrium diagrams and describe the changes which occurs on metals.
- To explain the concepts on various heat treatment operations.
- To explain the various ferrous and non-ferrous metals with their properties and applications.

**Course outcomes:** At the end of the course, students will be able to

- Relate crystal structures and identify the relation between different materials.
- Test the various mechanical properties of metal by suitable method.
- Relate the equilibrium transformation diagram for various ferrous and non-ferrous metals.
- Utilize appropriate techniques in treating with proper heat treatment operation.
- Evaluate the behavior of material when it subjected to heat treatment process.

### Unit I: INTRODUCTION

Definition – Classification and characteristics of Composite materials. Advantages and application of composites. Functional requirements of reinforcement and matrix. Effect of reinforcement (size, shape, distribution, volume fraction) on overall composite performance.

### Unit II: REINFORCEMENTS

Preparation-layup, curing, properties and applications of glass fibers, carbon fibers, Kevlar fibers and Boron fibers. Properties and applications of whiskers, particle reinforcements. Mechanical Behavior of composites: Rule of mixtures, Inverse rule of mixtures. Isostrain and Isostress conditions.

### Unit II: MANUFACTURING OF METAL MATRIX COMPOSITES

Casting – Solid State diffusion technique, Cladding – Hot isostatic pressing. Properties and applications. Manufacturing of Ceramic Matrix Composites: Liquid Metal Infiltration – Liquid phase sintering. Manufacturing of Carbon – Carbon composites: Knitting, Braiding, Weaving. Properties and applications.

### Unit IV: MANUFACTURING OF POLYMER MATRIX COMPOSITES

Preparation of Moulding compounds and prepregs – hand layup method – Autoclave method – Filament winding method – Compression moulding – Reaction injection moulding. Properties and applications.

## **Unit V: STRENGTH**

Laminar Failure Criteria-strength ratio, maximum stress criteria, maximum strain criteria, interacting failure criteria, hygrothermal failure. Laminate first ply failure-insight strength; Laminate strength-ply discount truncated maximum strain criterion; strength design using caplet plots; stress concentrations.

### **Text Books**

1. Material Science and Technology – Vol 13 – Composites by R.W.Cahn – VCH, WestGermany.
2. Materials Science and Engineering, An introduction. WD Callister, Jr., Adapted by R. Balasubramaniam, John Wiley & Sons, NY, Indian edition,2007.

### **Reference Books**

1. Hand Book of Composite Materials-ed-Lubin.
2. Composite Materials –K.K.Chawla.
3. Composite Materials Science and Applications – Deborah D.L.Chung.
4. Composite Materials Design and Applications – Danial Gay, Suong V. Hoa, and Stephen W.Tasi.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**WASTE TO ENERGY**

**Course Code: GR18D5206**

**L/T/P/C: 3/0/0/3**

**Course objectives**

- To find or recall the non-hazardous secondary materials from waste.
- To compare precisely to overcome the cost and most economically attractive course of action for CH<sub>4</sub> emission.
- To demonstrate the techno-economic feasibility of replacing.
- To extend the students for possible future activity in a biomass plant.
- To utilization in spark-ignited internal combustion engine.

**Course outcomes**

- Students are able to make use of energy installation and the small of household bio-waste incineration.
- To develop actual dimension must of course, fit requirement of the masonry block.
- To become capable of analyze and design of energy conversion system.
- Students are to estimate the possibility of invest in biomass generation.
- Students will be able to explain the biogas its uses and benefits.

**Unit I: INTRODUCTION TO ENERGY FROM WASTE**

Classification of waste as fuel – Agro based, Forest residue, Industrial waste - MSW – Conversion devices – Incinerators, gasifiers, digestors

**Unit II: BIOMASS PYROLYSIS**

Pyrolysis – Types, slow fast – Manufacture of charcoal – Methods - Yields and application – Manufacture of pyrolytic oils and gases, yields and applications.

**Unit III: BIOMASS GASIFICATION**

Gasifiers – Fixed bed system – Downdraft and updraft gasifiers – Fluidized bed gasifiers – Design, construction and operation – Gasifier burner arrangement for thermal heating – Gasifier engine arrangement and electrical power – Equilibrium and kinetic consideration ingasifier operation.

**Unit IV: BIOMASS COMBUSTION**

Biomass stoves – Improved chullahs, types, some exotic designs, Fixed bed combustors, Types, inclined grate combustors, Fluidized bed combustors, Design, construction and operation - Operation of all the above biomass combustors.

**Unit V: BIOGAS**

Properties of biogas (Calorific value and composition) - Biogas plant technology and status - Bio energy system - Design and constructional features - Biomass resources and their

classification - Biomass conversion processes - Thermo chemical conversion - Direct combustion - biomass gasification - pyrolysis and liquefaction - biochemical conversion - anaerobic digestion - Types of biogas Plants – Applications - Alcohol production from biomass - Bio diesel production - Urban waste to energy conversion - Biomass energy programme in India.

4. Biomass Conversion and Technology, C. Y. WereKo-Brobby and E. B. Hagan, John Wiley & Sons, 1996.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**ENGLISH FOR RESEARCH PAPER WRITING**

**Course Code: GR18D5207**

**L/T/P/C: 2/0/0/2**

**Course objectives**

- To state how to put research on paper
- To demonstrate how to write an abstract
- To apply the process of research
- To appraise the key skills involved in writing the title, abstract, introduction and review of literature
- To compose a paper which is good and has the qualities of acceptance and publication

**Course outcomes**

- Will be able to understand how to write a research paper
- Will outline the drafting of an abstract
- Will acquire the skills of various elements of research
- Will be in a position to write a good paper
- Will result in increasing the chance of publication

**Unit I**

Planning and Preparation, Word Order, Breaking up long sentences, Structuring Paragraphs and Sentences, Being Concise and Removing Redundancy, Avoiding Ambiguity and Vagueness.

**Unit II**

Clarifying Who Did What, Highlighting Your Findings, Hedging and Criticising, Paraphrasing and Plagiarism, Sections of a Paper, Abstracts, Introduction.

### **Unit III**

Review of the Literature, Methods, Results, Discussion, Conclusions, TheFinal Check.

### **Unit IV**

Key skills are needed when writing a Title, key skills are needed when writing an Abstract, key skills are needed when writing an Introduction, skills needed when writing a Review of the Literature.

### **Unit V**

Skills are needed when writing the Methods, skills needed when writing the Results, skills are needed when writing the Discussion, skills are needed when writing the Conclusion.

### **Reference Books**

4. Ian Wallwork , English for Writing Research Papers, Springer New York Dordrecht Heidelberg London, 2011.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**DISASTER MANAGEMENT**

**Course Code: GR18D5208**

**L/T/P/C: 2/0/0/2**

**Course objectives**

- Learn to demonstrate a critical understanding of key concepts in disaster risk reduction and humanitarian response.
- Critically evaluate disaster risk reduction and humanitarian response policy and practice from multiple perspectives.
- Develop an understanding of standards of humanitarian response and practical relevance in specific types of disasters and conflict situations.
- Critically understand the strengths and weaknesses of disaster management approaches,
- Planning and programming in different countries, particularly their home country or the countries they work in.

**Course outcomes**

- Capacity to integrate knowledge and to analyze, evaluate and manage the different public health aspects of disaster events at a local and global levels, even when limited information is available.
- Capacity to describe, analyze and evaluate the environmental, social, cultural, economic, legal and organizational aspects influencing vulnerabilities and capacities to face disasters.
- Capacity to work theoretically and practically in the processes of disaster management (disaster risk reduction, response, and recovery) and relate their interconnections, particularly in the field of the Public Health aspects of the disasters.
- Capacity to manage the Public Health aspects of the disasters. Capacity to obtain, analyze, and communicate information on risks, relief needs and lessons learned from earlier disasters in order to formulate strategies for mitigation in future scenarios with the ability to clearly present and discuss their conclusions and the knowledge and arguments behind them.

**Unit I: INTRODUCTION**

Disaster: Definition, Factors and Significance; Difference between Hazard and Disaster; Natural and Manmade Disasters: Difference, Nature, Types and Magnitude.

**Unit II: REPERCUSSIONS OF DISASTERS AND HAZARDS**

**Economic Damage**, Loss of Human and Animal Life, Destruction of Ecosystem. **Natural Disasters**: Earthquakes, Volcanisms, Cyclones, Tsunamis, Floods, Droughts and Famines, Landslides and Avalanches, Man-made disaster: Nuclear Reactor Meltdown, Industrial Accidents, Oil Slicks and Spills, Outbreaks of Disease and Epidemics, War and Conflicts.

### **Unit III: DISASTER PRONE AREAS IN INDIA**

Study of Seismic Zones; Areas Prone To Floods and Droughts, Landslides and Avalanches; Areas Prone To Cyclonic and Coastal Hazards with Special Reference to Tsunami; Post-Disaster Diseases and Epidemics

### **Unit IV: DISASTER PREPAREDNESS AND MANAGEMENT**

Preparedness: Monitoring Of Phenomena Triggering A Disaster Or Hazard; Evaluation Of Risk: Application Of Remote Sensing, Data From Meteorological And Other Agencies, Media Reports: Governmental And Community Preparedness.

### **Unit V: RISK ASSESSMENT**

Disaster Risk: Concept and Elements, Disaster Risk Reduction, Global and National Disaster Risk Situation. Techniques of Risk Assessment, Global Co- Operation in Risk Assessment and Warning, People's Participation in Risk Assessment. Strategies for Survival.

### **Reference Books**

2. Sahni, PardeepEt.Al. (Eds.)," Disaster Mitigation Experiences and Reflections", Prentice Hall Of India, NewDelhi.Goel S. L., Disaster Administration And Management Text And Case Studies" ,Deep &Deep Publication Pvt. Ltd., NewDelhi.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**SANSKRIT FOR TECHNICAL KNOWLEDGE**

**Course Code: GR18D5209**

**L/T/P/C: 2/0/0/2**

**Course objectives**

- To get a working knowledge in illustrious Sanskrit, the scientific language in the world.
- Learning of Sanskrit to improve brain functioning.
- Learning of Sanskrit to develop the logic in mathematics, science & other subjects.
- Enhancing the memory power.
- The engineering scholars equipped with Sanskrit will be able to explore the huge knowledge from ancient literature.

**Course outcomes**

- Understanding basic Sanskrit alphabets and Understand tenses in Sanskrit Language.
- Enable students to understand roots of Sanskrit language.
- Students learn engineering fundamentals in Sanskrit.
- Students can attempt writing sentences in Sanskrit.
- Ancient Sanskrit literature about science & technology can be understood.

**Unit I**

Alphabets in Sanskrit, Past/Present/FutureTense, Simple Sentences

**Unit II**

Order, Introduction of roots, Technical information about Sanskrit Literature

**Unit III**

Technical concepts of Engineering-Electrical, Mechanical, Architecture, Mathematics

**Reference Books**

1. "Abhyaspustakam" – Dr.Vishwas, Samskrita-Bharti Publication, NewDelhi
2. "Teach Yourself Sanskrit" Prathama Deeksha-VempatiKutumbshastri, RashtriyaSanskrit Sansthanam, New DelhiPublication
3. "India's Glorious Scientific Tradition" Suresh Soni, Ocean books (P) Ltd., NewDelhi.

## VALUE EDUCATION

**Course Code: GR18D5210**

**L/T/P/C: 2/0/0/2**

### **Course objectives**

- Understand value of education and self-development.
- Imbibe good values in students.
- Let the should know about the importance of character.
- To understand the significance of human conduct and self-development.
- To enable students to imbibe and internalize the value and Ethical behavior in personal and professional lives.

### **Course outcomes**

- Knowledge of self-development.
- Learn the importance of Human values.
- Developing the overall personality.
- Student will be able to realize the significance of ethical human conduct and self-development.
- Students will be able to inculcate positive thinking, dignity of labour and religious tolerance.

### **Unit I**

Values and self-development –Social values and individual attitudes, Work ethics, Indian vision ohumanism, Moral and non- moral valuation, Standards andprinciples, Value judgement.

### **Unit II**

Importance of cultivation ofvalues, Sense of duty. Devotion, Self-reliance. Confidence, Concentration. Truthfulness, Cleanliness. Honesty, Humanity. Power of faith, National Unity. Patriotism. Love for nature, Discipline

### **Unit III**

Personality and Behavior Development - Soul and Scientific attitude, Positive Thinking, Integrity and discipline, Punctuality, Love andKindness, Avoid faultThinking, Free from anger, Dignity of labour, Universal brotherhood and religioustolerance, True friendship, Happiness vs suffering, love fortruth, Aware of self-destructive habits, Association andCooperation, Doing best for savingnature.

### **Unit IV**

Character and Competence –Holy books vs Blindfaith. Self-management and Goodhealth.Science ofreincarnation.Equality, Nonviolence, Humility, Role ofWomen. All religions and same message. Mind your Mind,Self-control. Honesty, Studyingeffectively

### **Reference Books**

1. Chakroborty, S.K. “Values and Ethics for organizations Theory and practice”, Oxford University Press, New Delhi.

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**INDIAN CONSTITUTION**

**Course Code: GR18D5211**

**L/T/P/C: 2/0/0/2**

**Course objectives**

- Understand the premises informing the twin themes of liberty and freedom from a civil rights perspective.
- To address the growth of Indian opinion regarding modern Indian intellectuals constitutional
- Role and entitlement to civil and economic rights as well as the emergence of nationhood in the early years of Indian nationalism.
- To address the role of socialism in India after the commencement of the Bolshevik Revolution in 1917 and its impact on the initial drafting of the Indian Constitution.
- To understand the role and functioning of Election Commission of India.

**Course outcomes**

- Discuss the growth of the demand for civil rights in India for the bulk of Indians before the arrival of Gandhi in Indian politics.
- Discuss the intellectual origins of the framework of argument that informed the conceptualization of social reforms leading to revolution in India.
- Discuss the circumstances surrounding the foundation of the Congress Socialist Party [CSP] under the leadership of Jawaharlal Nehru and the eventual failure of the proposal of direct elections through adult suffrage in the Indian Constitution.
- Discuss the passage of the Hindu Code Bill of 1956.
- Discuss the significance of Election Commission of India.

## **Unit I: HISTORY OF MAKING OF THE INDIAN CONSTITUTION**

History Drafting Committee, (Composition & Working).

## **Unit II: PHILOSOPHY OF THE INDIAN CONSTITUTION**

Preamble Salient Features.

## **Unit III: CONTOURS OF CONSTITUTIONAL RIGHTS & DUTIES**

Fundamental Rights, Right to Equality, Right to Freedom, Right against Exploitation, Right to Freedom of Religion, Cultural and Educational Rights, Right to Constitutional Remedies, Directive Principles of State Policy, Fundamental Duties.

## **Unit IV: ORGANS OF GOVERNANCE**

Parliament-Composition, Qualifications and Disqualifications, Powers and Functions, Executive, President, Governor, Council of Ministers, Judiciary, Appointment and Transfer of Judges, Qualifications, Powers and Functions.

## **Unit V: LOCAL ADMINISTRATION**

District's Administration head: Role and Importance, Municipalities: Introduction, Mayor and role of Elected Representative, CEO of Municipal Corporation. Pachayati raj: Introduction, PRI: Zila Pachayat. Elected officials and their roles, CEO Zila Pachayat: Position and role. Block level: Organizational Hierarchy (Different departments), Village level: Role of Elected and Appointed officials, Importance of grass root democracy.

4. D.D. Basu, Introduction to the Constitution of India, Lexis Nexis, 2015.

# **GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

## **PEDAGOGY STUDIES**

**Course Code: GR18D5212**

**L/T/P/C: 2/0/0/2**

### **Course objectives**

- Review existing evidence on the review topic to inform Programme design and policy making
- Undertaken by the DFID, other agencies and researchers.
- Identify critical evidence gaps to guide the development.
- Establishing coordination among people in order to execute pedagogy methods.
- To study pedagogy as a separate discipline.

### **Course outcomes**

- What pedagogical practices are being used by teachers in formal classrooms in developing countries?
- What pedagogical practices are being used by teachers in informal classrooms in developing countries?
- Synergy from the work force.
- What is the evidence on the effectiveness of these pedagogical practices, in what conditions, and with what population of learners?
- How can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy?

### **Unit I: INTRODUCTION AND METHODOLOGY**

Aims and rationale, Policy background, Conceptual framework and terminology Theories of learning, Curriculum, Teacher education. Conceptual framework, Research questions. Overview of methodology and Searching.

### **Unit II: THEMATIC OVERVIEW**

Pedagogical practices are being used by teachers in formal and informal classrooms in developing countries. Curriculum, Teacher education.

### **Unit III: EVIDENCE ON THE EFFECTIVENESS OF PEDAGOGICAL PRACTICES**

Methodology for the in-depth stage: quality assessment of included studies. How can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy? Theory of change. Strength and nature of the body of evidence

for effective pedagogical practices. Pedagogic theory and pedagogical approaches. Teachers' attitudes and beliefs and Pedagogic strategies.

#### **Unit IV: PROFESSIONAL DEVELOPMENT**

Alignment with classroom practices and follow-up support, Peer support, Support from the head teacher and the community, Curriculum and assessment, Barriers to learning: limited resources and large class sizes.

#### **Unit V: RESEARCH GAPS AND FUTURE DIRECTIONS**

Research design, Contexts, Pedagogy, Teacher education, Curriculum and assessment, Dissemination and research impact.

#### **Reference Books**

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**

**STRESS MANAGEMENT BY YOGA**

**Course Code: GR18D5213**

**L/T/P/C: 2/0/0/2**

**Course objectives**

- To achieve overall Good Health of Body and Mind.
- To lower blood pressure and improve heart health.
- To become non-violent and truthfulness.
- To increase the levels of happiness.
- To eliminate all types of body pains.

**Course outcomes**

- Develop healthy mind in a healthy body thus improving social health also improve efficiently.
- Develop body awareness. Learn how to use their bodies in a healthy way. Perform well in sports and academics.
- *Will balance, flexibility, and stamina, strengthen muscles and connective tissues enabling good posture.*
- Manage stress through breathing, awareness, meditation and healthy movement.
- Build concentration, confidence and positive self-image.

**Unit I**

Definitions of Eight parts of yog. (Ashtanga)

**Unit II**

Yam and Niyam. Do`s and Don`t`s in life. Ahinsa, satya, astheya, bramhacharya  
and aparigraha Shaucha, santosh, tapa, swadhyay, ishwarpranidhan

### **Unit III**

Asan and Pranayam, Various yog poses and their benefits for mind & body. Regulation of  
breathing techniques and its effects-Types of pranayam

### **Reference Books**

1. ‘Yogic Asanas for Group Training-Part-I’ : Janardan Swami Yogabhyasi Mandal, Nagpur
2. ‘Rajayoga or conquering the Internal Nature’ by Swami Vivekananda,  
Advaita Ashrama (Publication Department), Kolkata

**GOKARAJU RANGARAJU INSTITUTE OF ENGINEERING AND TECHNOLOGY**  
**PERSONALITY DEVELOPMENT THROUGH LIFE ENLIGHTENMENT SKILLS**

**Course Code: GR18D5214**

**L/T/P/C: 2/0/0/2**

**Course objectives**

- To learn to achieve the highest goal happily
- To become a person with stable mind, pleasing personality and determination
- To awaken wisdom in students
- To differentiate three types of happiness (Sukham)
- To describe the character traits of a spiritual devotee

**Course outcomes**

- Study of Shrimad- Bhagwad-Gita will help the student in developing his personality and achieve the highest goal in life
- The person who has studied Geeta will lead the nation and mankind to peace and prosperity
- To develop self-developing attitude towards work without self-aggrandizement
- To develop tranquil attitude in all favorable and unfavorable situations
- To develop high spiritual intelligence

**Unit I: Neetisatakam-Holistic development of personality**

- Verses- 19,20,21,22 (wisdom)
- Verses- 29,31,32 (pride &heroism)
- Verses- 26,28,63,65 (virtue)
- Verses- 52,53,59 (dont's)
- Verses- 71,73,75,78 (do's)

**Unit II:** Approach to day to day work and duties.

- Shrimad Bhagwad Geeta : Chapter 2-Verses 41,47,48,
- Chapter 3-Verses 13, 21, 27, 35, Chapter 6-Verses 5,13,17, 23,35,
- Chapter 18-Verses 45, 46,48.

**Unit III:** Statements of basic knowledge.

- Shrimad Bhagwad Geeta: Chapter 2-Verses 56, 62,68
- Chapter 12 -Verses 13, 14, 15, 16,17,18
- Personality of Role model. Shrimad Bhagwad Geeta: Chapter 2-Verses 17, Chapter 3-Verses 36,37,42,
- Chapter 4-Verses 18,38,39
- Chapter 18 – Verses 37,38,63

### **Reference Books**

1. “Srimad Bhagavad Gita” by Swami Swarupananda Advaita Ashram (Publication Department), Kolkata
2. Bhartrihari’s Three Satakam (Niti-sringar-vairagya) by P.Gopinath, Rashtriya Sanskrit Sansthanam, New Delhi.
